<b>Annexes</b> .....	<b>20</b>

The United Nations Development Assistance Framework (2014-2018) for Kenya is an expression of the UN's commitment to support the Kenyan people in their self-articulated development aspirations. This UNDAF has been developed according to the principles of UN Delivering as One (DaO), aimed at ensuring Government ownership, demonstrated through UNDAF's full alignment to Government priorities and planning cycles, as well as internal coherence among UN agencies and programmes operating in Kenya.

The UNDAF narrative includes five recommended sections: Introduction and Country Context, UNDAF Results, Resource Estimates, Implementation Arrangements, and Monitoring and Evaluation as well as a Results and Resources Annex<sup>1</sup>.

The processes behind the formulation of UNDAF 2014-2018 were extensively participatory and interactive and focused on areas in which the UN Country Team (UNCT) is best positioned to contribute. Formulation was guided by the undg Preparation Guidelines, the Quadrennial Comprehensive Policy Review (QCPR-2012) and the 2010 Guidance Note on the application of UN Country Programming Principles to the UNDAF.

Developed under the leadership of the Government, the UNDAF reflects the efforts of all UN agencies working in Kenya and is shaped by the five undg programming principles: Human Rights-based approach, gender equality, environmental sustainability, capacity development, and results-based management. The UNDAF working groups have developed a truly broad-based Results Framework, in collaboration with Civil Society, donors and other partners.

The UNDAF has four Strategic Results Areas: 1) Transformational Governance encompassing Policy and Institutional Frameworks; Democratic Participation and Human Rights; Devolution and Accountability; and Evidence-based Decision-making, 2) Human Capital Development comprised of Education and Learning; Health, including Water, Sanitation and Hygiene (WASH), Environmental Preservation, Food Availability and Nutrition; Multi-sectoral HIV and AIDS Response; and Social Protection, 3) Inclusive and Sustainable Economic Growth, with Improving the Business Environment; Strengthening Productive Sectors and Trade; and Promoting Job Creation, Skills Development and Improved Working Conditions, and 4) Environmental Sustainability, Land Management and Human Security including Policy and Legal Framework Development; and Peace, Community Security and Resilience. The UNDAF Results Areas are aligned with the three Pillars (Political, Social and Economic) of the Government's Vision 2030 transformational agenda.

The UNCT estimates that approximately \$(US) 1.2 billion (for both humanitarian and development assistance) will be needed over the 2014-2018 four-year period to achieve the 13 UNDAF outcomes. This includes the financial resource allocations that UN agencies will receive and the funds that they expect to mobilize from external sources.

The UNCT, under the leadership of the UN Resident Coordinator, will be responsible for the implementation of the UNDAF for the 2014-2018 period. Under the DaO "One Leader" approach the Resident Coordinator and the UN Country Team will be responsible for the oversight of the Results Groups, the Operations Management Team and the Country Communications Group. The National Steering Committee (NSC) will directly oversee the One Budgetary Framework and Programme.

The Republic of Kenya, the UN System and donors will work together in the spirit of partnership to implement the UNDAF, as a contribution to the achievement of national development goals and aspirations and as a concrete step towards the realization of Kenya's developmental commitments to its people and the international community.

---

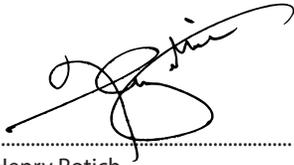

<sup>1</sup> Inclusion of a section on Initiatives outside UNDAF was considered but it was UNCT's agreement that all initiatives would fall within the utilized framework.

## UNDAF Preamble and Joint Statement of Commitment

The UN Country Team in Kenya (UNCT), working collaboratively and inspired by the national aspirations articulated in Kenya's Vision 2030 will engage with the Government to support real transformative progress towards: i) a state of good governance anchored in the Rule of Law, ii) a development process led and driven by an inclusive, healthy, highly skilled and motivated human capital, iii) an industrializing economy in which growth is inclusive and achieves sustainable development, trade is competitive and regionally integrated, employment is stable, private sector-driven, Human Rights-compliant and accessible to women, youth and vulnerable groups, iv) underpinned by efficient management of natural resources, equitable access to development assets, including land and renewable resources, and sustainable national cohesion and peace.

This United Nations Development Assistance Framework is the fourth generation Programme Document produced by the United Nations System in Kenya and covers the period 2014-2018. The uniqueness of this UNDAF lies in its foundation in the UN's "Delivery as One" approach, and its participatory formulation with other key stakeholders through an elaborate consultative process reinforcing the principles of the Paris Declaration on Aid Effectiveness and the Accra Agenda for Action. The Government of Kenya and the UN System are committed to working together in the spirit of partnership to implement the UNDAF, as a contribution to the achievement of national development goals and aspirations and as a concrete step towards the realization of Kenya's developmental commitments to its people and the international community. We will act together in cognizance of this opportunity and responsibility.

On behalf of the Government of Kenya

.....  
Mr. Henry Rotich  
Cabinet Secretary  
National Treasury

On behalf of the UN System in Kenya

.....  
Ms. Nardos Bekele-Thomas  
UN Resident Coordinator  
UNDP Resident Representative

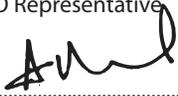

.....  
Ms. Anne Waiguru  
Cabinet Secretary  
Devolution and Planning

## UNCT Signatures

We, the United Nations Country Team in Kenya, while representing each organization's mandates, competencies and decision-making processes, pledge our commitment to the UNDAF IV as a means to foster cooperation, coordination and enhance UN coherence in the spirit of "Delivery as One" to improve performance towards achieving measurable results and impact of our joint response to the development needs of Kenya.

# 1 Introduction

## 1.1 United Nations in Kenya

The UN Country Team (UNCT) is a trusted partner in Kenya, supporting the Government to achieve its development goals. Recent successes include its support to developing Vision 2030 and its Medium Term Plans 1 and 2 (for 2008-2012 and 2013-2017), interventions during the post-election violence of 2007/2008, the Constitutional referendum of 2010 and the 2013 General Elections.

During UNDAF 2009-2013 important lessons have been learned, that are applicable to the realization of UNDAF 2014-2018 to maximize the impact of the UN's contribution. UNDAF 2014-2018 will need to employ robust planning, monitoring and evaluation frameworks, articulated from the outset and with well-defined indicators to clearly relate inputs to activities, outputs and outcomes. UN interventions will also need to be strategically focused at the highest level, moving away from service delivery to provide more definitive support to policy formulation and implementation, relating to the UN's critical role in policy advice and capacity development assistance. In addition, deliberate and targeted efforts will need to be made to fully mainstream gender, Human Rights and environmental sustainability in the design, implementation, monitoring and evaluation of this and all future UNDAFs. Finally, the UN recognizes the critical importance of continuing broad and inclusive consultation processes involving key stakeholders and led by the Government itself.

## 1.2 UNDAF 2014-2018 Preparation Process

The United Nations Development Assistance Framework (2014-2018) for Kenya is an expression of the United Nations' commitment to support the Kenyan people in their self-articulated development aspirations. This UNDAF constitutes a break with the past in the sense that it has been developed according to the principles of UN Delivering as One (DaO), aimed at ensuring Government ownership, demonstrated through UNDAF's alignment to Government priorities and planning cycles, as well as internal coherence among UN agencies and programmes operating in Kenya.

The processes behind the strategic choices and results formulation for UNDAF 2014-2018 were extensively participatory, interactive and iterative and focused on areas in which the UNCT is best positioned to contribute. They were guided by the 2010 UNDG Preparation Guidelines, the 2012 Quadrennial Comprehensive Policy Review (QCPR) and the 2010 Guidance Note on the application of UN Country Programming Principles to the UNDAF. In order to tailor UN's support to Kenya's Vision 2030-driven transformational agenda, UNDAF development evolved into a capacity building exercise in transformational development planning for the Government, UN and other key stakeholders, including Civil Society.

Three innovative planning tools were used to ensure a strengthened Government role as leader and driver of development processes and to facilitate participation and assurance of national ownership of all development results. These included the use of: (i) Subject, Dimensions and Qualifier (SDQ) techniques for participatory result formulation; (ii) fully logical result frameworks for vertical and horizontal visualization of national transformation scenarios and chronology; and (iii) 3-D Logical frameworks for clear delineation of the leadership role of Government and to ensure complementary contributions among international partners (UN, bilateral donors and BWIs) in support of Government-led results achievement. The shift to upstream focus for UN efforts in Kenya and the joint programming practices under DaO are expected to facilitate collaboration and Government leadership.

The UNDAF reflects the efforts of all UN agencies and key partners working in Kenya. The design of the UNDAF evolved from strategic discussions, both within the UN and with stakeholders, to determine how the UN System is best suited to support the Government's goals. Shaped by the five UNDG programming principles (a Human Rights-based approach, Gender equality, Environmental sustainability, Results-based management, and Capacity development) working groups have developed a truly broad-based Results Framework, in collaboration with Government, Civil Society, donors and other partners.

### 1.3 Country Context

Kenya has an estimated population of 44.0 million (July 2013) with equal proportions of male and female. Sixty-one percent of the population is under 25 years of age, with 42% aged 0-15 and 19% aged 15-24. At the current annual growth rate of 2.9%, the population of Kenya would reach 70 million by 2030.

Kenya is currently undergoing a significant transition to a new constitutional order, ushered in through referendum in 2010. Today, the country is relatively peaceful and stable, as evidenced by the non-violent national elections of March 2013, which brought the Jubilee Coalition into power. During the 2003-2007 period there was broad-based economic growth after a decade of contraction. Following this there was a sharp retrenchment, due to the post-election violence of 2007/08, that saw GDP fall from an annual growth rate of 7.0% to 1.7%. The economy recovered in 2012 with an annual growth of 4.6%; all sectors recorded advances. However, Kenya's Human Development Index (HDI) still ranks within the Low Human Development Country Category. With a Gini Coefficient 0.446<sup>1</sup>, Kenya is the 10th most unequal country globally and the fifth most unequal of Africa's 54 states.

Kenya now sits at the threshold of a period of potentially accelerated development given the reforms of the 2010 Constitution. Estimates indicate that real GDP growth will average 6% annually from 2014 to 2018, as Kenya begins to realize its enormous but, as yet, unfulfilled potential. Government commitment to political and economic reforms should stabilize the economy and promote social cohesion, helping Kenya maintain its preeminent status as a regional economic powerhouse.

The 2010 Constitution specifically addresses long-standing historical, geographic, demographic, and gender issues that have hindered Kenya's development. It is people-centered and Human Rights-based, with a key feature being the devolution of political power and resources to 47 newly decentralized counties. Devolved governance offers greater opportunities but also new challenges. It is expected that financial resources will be closer to the people thereby enhancing the space for their involvement in development and reducing the potential for social conflict associated with the quest for equitable distribution of wealth and the sharing of power. Devolution should lead to more inclusive sustainable development and reduce historical marginalization; however, there is also a possibility that the devolved units may be new frontiers for inter and intra-county conflicts. To ensure that devolution is effective there is need to strengthen institutional, leadership and human resource capacities and accountability systems at both national and county levels. This will ensure county Governments' delivery of sustainable results and the potential for innovation and advancement.

The Constitution establishes a fully independent, bicameral legislature with a clear separation of powers. As one of the most progressive and foresighted constitutions in Africa, it advances Kenya's long-term development aspirations laid out in the Government's Vision 2030 and its Second Medium Term Plan (MTP2) for 2013-2017.

Kenya's per capita GDP of \$(US) 820 places it 24th in Sub-Saharan Africa and well below the threshold of \$(US) 1,025 for middle income country status<sup>2</sup>. Modest progress has been made towards the MDGs, especially MDG 8 - Global partnerships for development, MDG 2 - Universal primary education and MDG 6 - Combating HIV and AIDS, malaria and other diseases. However, major gaps remain with respect to Infant Mortality (MDG 4), Maternal Mortality (MDG 5), Poverty and Child Malnutrition (MDG 1), and Gender Equality and Women's Empowerment (MDG 3). These will require continued and accelerated efforts to get back on track.

The human and economic impact of disasters arising from periodic flooding, droughts and landslides are estimated at \$(US) 12.1 billion<sup>3</sup>, for the period 2008-2011. In combination with past election-related violence, this has resulted in a significant number of IDPs (approx. 400,000<sup>4</sup>). Kenya also hosts over 565,000 refugees, mainly in Dadaab and Kakuma, two of the largest refugee camps in the world.

---

<sup>2</sup> Estimates of Poverty and Inequality in Kenya, August 2013

<sup>2</sup> Kenya Economic Update, WB, June 2013

<sup>3</sup> PDNA Report, 2013

<sup>4</sup> World Bank Indicators, Kenya - Conflict and Fragility, 2008

Extreme inequality is reflected in almost every sphere of Kenyan life; particularly the distribution of income and wealth, access to education, water, land and health services. The rate of extreme poverty in 2009 was 42%, down from 52% in 2000. Women, children and youth are the most seriously affected by inequality, exclusion, and poverty. This is especially evident among the populations in the Arid and Semi-Arid Lands (ASAL) that comprise 80% of the country. Major disparities persist across counties<sup>5</sup>. The levels of poverty and unemployment pose additional security challenges and are of particular concern given the high rates of urban crime and violence and the proliferation of small arms. In spite of Kenya's fairly robust multi-party democracy and its history of vibrant media and Civil Society engagement, bureaucratic accountability and law enforcement are weak resulting in high levels of corruption (139th out of 176 on the 2012 Corruption Perception Index). On-going reforms in the judiciary and Rule of Law sectors should improve transparent and accountable public service delivery.

Kenya's private sector is the major driver of the economy. Micro, small and medium sized enterprises generate roughly 85% of employment and 20% of GDP. The economy, however, remains highly dualistic with a formal private sector employing 2.2 million persons (of which only 32% are women) operating alongside an informal sector of more than 10.5 million.

The agricultural sector, through direct and indirect impacts, contributes approximately half of Kenya's GDP. The sector accounts for 65% of Kenya's total exports and provides more than 18% of formal employment opportunities and more than 70% of informal employment<sup>6</sup>. Moving forward, key challenges in the agricultural sector are associated with gender-based inequities in the access to productive inputs. Women constitute 80% of the agricultural labour force but only five percent own land, less than 10% have access to credit, and women hold only 1% of all agricultural credit<sup>7</sup>. Opportunities for training are limited. Gender-based inequalities in the sector persist despite evidence that suggests that achieving gender equity in access to agricultural inputs can yield enormous economic and human development gains<sup>8</sup>.

## 1.4 The Kenya Development Framework

The overall goal of Kenya's Vision 2030 is, "to create a globally competitive and prosperous nation with a high quality of life by 2030, that aims to transform Kenya into a newly industrializing, middle-income country for all citizens in a clean and secure environment".

Kenya Vision 2030 is anchored on three key pillars - Political, Social and Economic. In its MTP2, the Government focuses primarily on economic growth as a driver for developmental success across all pillars. Its target is 10% annual GDP growth by 2017, intending to reduce poverty and inequalities. Kenya aims to realize the unfinished MDGs by the end of MTP2 thereby creating the foundation for attaining its post-2015 Sustainable Development Goals. The Vision is to be achieved through a number of successive five-year Medium Term Plans (MTPs).

Following the conclusion of MTP1 (2008-2012), MPT2 was launched to cover the subsequent period (2013-2017). While there is consensus that most of the objectives of the first MTP1 were achieved, there is also a general acknowledgement that more concerted effort is required if Vision 2030 is to be fully realized.

MTP2 differs from the prior MTP in that it was developed and is being implemented in the context of Kenya's 2010 Constitution, which provides for a devolved governance structure, with power and resources decentralized to 47 counties. Almost all aspects of the implementation of MTP2 will be affected by this new reality.

6 Government of Kenya, Agricultural Sector Development Strategy 2010-2020

7 World Bank, Gender and Economic Growth in Kenya: Unleashing the Power of Women, 2007

8 FAO; World Bank, Gender and Economic Growth in Kenya: Unleashing the Power of Women

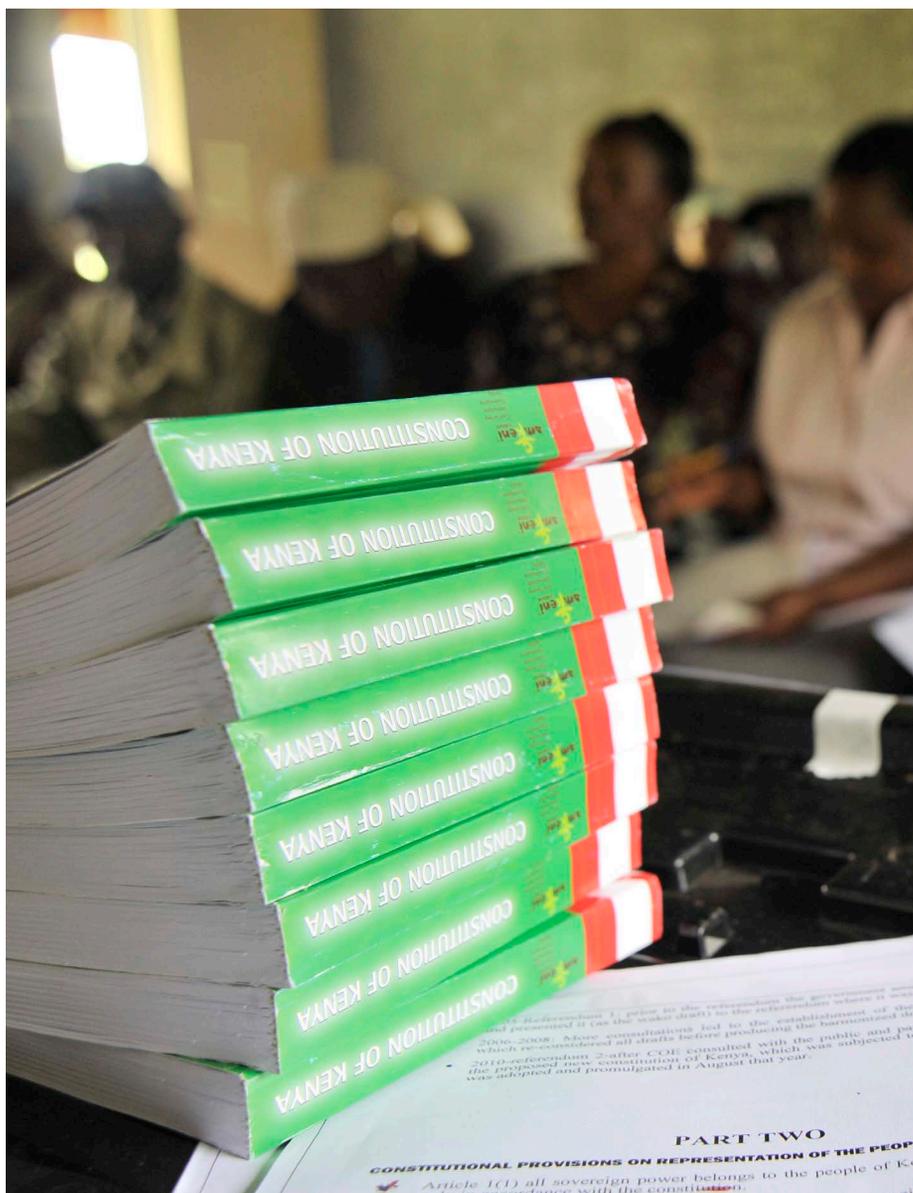

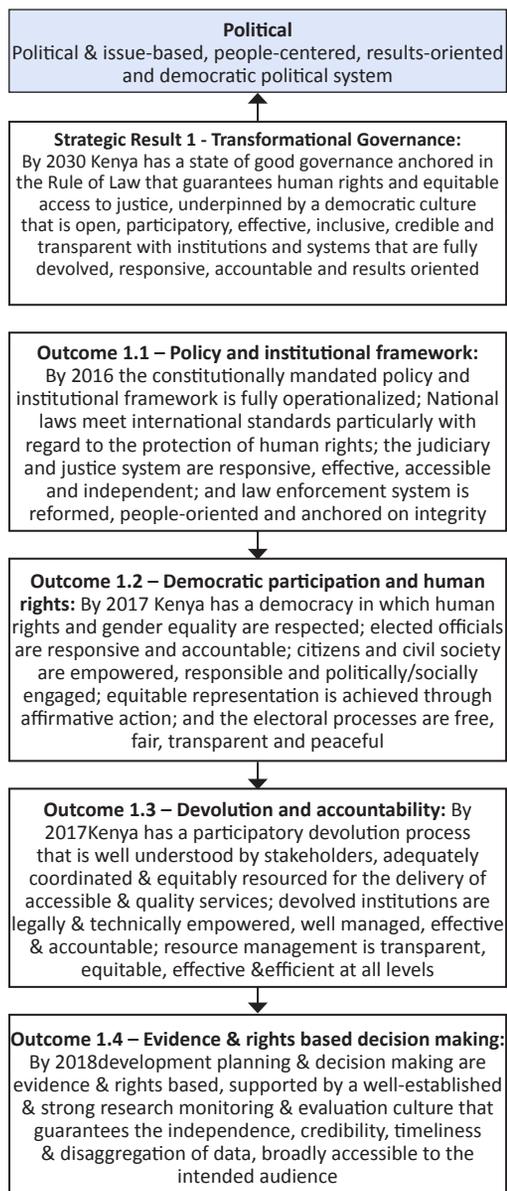

As part of the ongoing dialogue on UN reform toward “Delivery as One” modalities, the Government has requested that future UN support to Kenya be more strategic, long-term looking and fully aligned to the current Medium-Term development Plan (MTP2) and to Vision 2030. In order to achieve this, the Government and the UN have agreed on four long term strategic results, articulated below, that will guide the design of successive UNDAFs between now and 2030: Transformational Governance; Human Capital Development; Inclusive and Sustainable Economic Growth; and Environmental Sustainability, Land Management and Human Security. This logical flow indicates recognition by Government and stakeholders of the importance of Good Governance, respect for Human Rights, promotion of Gender Equality and Environmental Sustainability, and the building of a strong Human Capital base as a foundation for sustainable economic development. The UN’s Development Assistance Framework (UNDAF 2014-2018) has thirteen outcomes, which are organized around the above four long-term strategic contributions of the UN to Kenya.

### **2.1 Strategic Result No. 1: Transformational Governance**

*By 2030, Kenya enjoys a state of good governance anchored in the Rule of Law that guarantees Human Rights and equitable access to justice, underpinned by a democratic culture that is open, participatory, effective, inclusive, credible and transparent, with institutions and systems that are fully devolved, responsive, accountable and results-oriented.*

The UN believes that achieving sustainable human development, inclusive growth and a peaceful and just society will not happen without a foundation of Good Governance. In pursuit of this, the Government and the UN have identified four UNDAF outcome domains, under the Transformational Governance Strategic Result Area, for UN support: Policy and Institutional Frameworks; Democratic Participation and Human Rights; Devolution and Accountability; and Evidence and Human Rights-based Decision-making.

The UN will support the development of a sound policy and institutional framework to ensure that by 2016, the constitutionally mandated policy and institutional framework is fully operationalized. Specifically, that national laws meet international standards, particularly with regard to the protection of Human Rights; the Judiciary and Justice Systems are responsive, effective accessible and independent; and the Law Enforcement System is reformed, people-oriented and anchored in integrity. Achieving this outcome as early as 2016 would lay a solid foundation for effective transformational development in Kenya.

Building on an enabling policy environment, the UN will support Government efforts to enhance democratic participation and respect for Human Rights to ensure that by 2017, Kenya enjoys a democracy in which Human Rights and gender equality are respected; elected officials are responsive and accountable; citizens and Civil Society are empowered, responsible, and politically and socially engaged; equitable representation is achieved through affirmative action; and the electoral processes are free, fair, transparent and peaceful. The achievement of this outcome will create conditions for effective decentralization of the administration. These include the development of systems and mechanisms to ensure that citizens' voices are heard in decision-making and hold institutions accountable.

The devolution process in Kenya will not succeed if it is not anchored on a solid democratic and accountability culture. The UN will support the Government, in collaboration with other partners (donors), to ensure that by 2017, Kenya enjoys a participatory and devolved governance process that is well understood by stakeholders, adequately coordinated and equitably resourced for the delivery of accessible and quality services; devolved institutions are legally, financially and technically empowered, well managed, effective, and accountable; and resource management is transparent, equitable, effective and efficient, at all governance levels.

Finally, to be effective, sustainable and responsive, the transformation of Kenya must be knowledge-driven. In this regard, the UN's support will be directed toward ensuring that by 2018, development planning and decision-making are evidence and rights-based, supported by a well-established and robust research, monitoring and evaluation culture that guarantees the independence, credibility, timeliness and disaggregation of data, broadly accessible to the intended audience. Positioning strategic monitoring and evaluation functions at the highest levels of the Legislative and Executive branches (national and county) is a high priority in MTP2, and is expected to improve the quality and relevance of Executive decisions, strengthen the culture of accountability and promote innovation, adaptability and learning.

The four Governance outcomes are mutually reinforcing and designed to trigger sequential transformations in Kenya's governance system, creating enabling conditions for a peaceful and just society and people-driven sustainable development.

The UN will support the transformative process through advocacy, technical support and capacity development, particularly in the areas of policy and legislative framework development, partnership building, knowledge generation and South-South cooperation facilitation.

Details of the outcome indicators, outputs and partners for contributing to all four Strategic Results can be found in the annexed Results Matrix. The Transformative Governance work under the UNDAF is aligned with the Political Pillar of Vision 2030

## **2.2 Strategic Result 2: Human Capital Development**

*By 2030, Kenya's development is led and driven by a healthy, highly skilled, innovative, resourceful and motivated human capital, in an empowered, resilient and inclusive society that is reconciled, peaceful, cohesive, gender responsive and infused with integrity.*

Kenya's infant and under-five mortality rates have not improved since 2009 and the maternal mortality rate is three times higher than the 2015 MDG target [147 maternal deaths per 100,000 live births by 2015], reflecting overall health system limited performance.

To realize a cohesive society made up of healthy and highly skilled women and men as a foundational step towards equitable and sustainable development, the Government and the UN have identified four inter-related UNDAF outcome domains under the Human Capital Strategic Result Area: Education and Learning; Health, including Water, Sanitation, Hygiene (WASH) and Environmental Preservation, Food Availability and Nutrition; Multi-sectoral HIV and AIDS Response; and Social Protection.

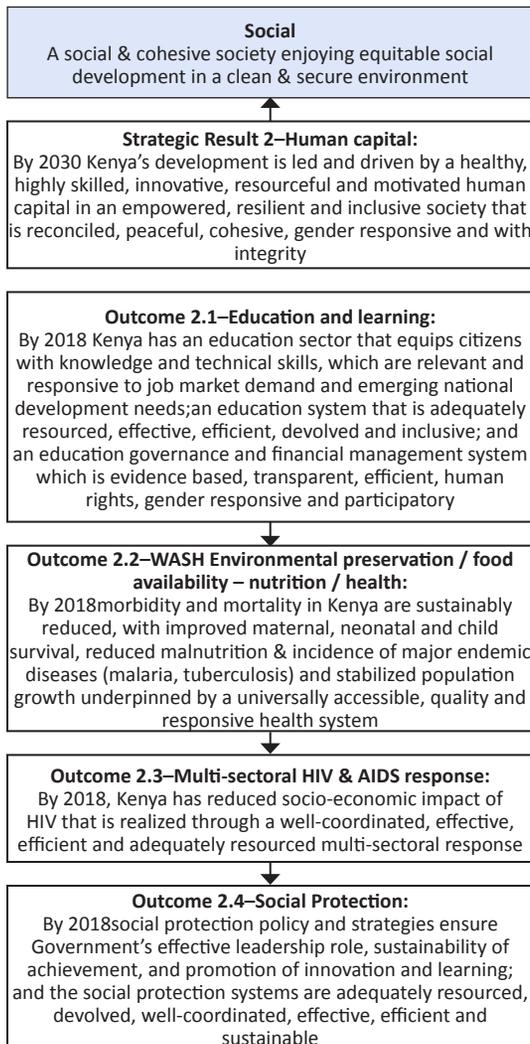

For education and learning, the UN will provide support through national and county Governments to ensure that by 2018 Kenya has a competitive human capital empowered by high quality education, knowledge and skills, and responsive to new and emerging needs. It is globally recognized that achieving Education for All goal is critical for attaining all eight MDGs<sup>9</sup>.

---

<sup>9</sup> "When we put education first, we can reduce poverty and hunger, end wasted potential and look forward to stronger and better societies for all." (Ban Ki-moon, Secretary General of the United Nations, 2013)

Although Kenya is on track for achieving MDG2(Universal Primary Education) there are disparities and quality issues, which will require special attention. Regarding universal access, the Kenyan Cabinet recently approved a Bill that guarantees free Secondary, Primary and Early Childhood Development Education (ECDE). Its operationalization will benefit from UN's normative support.

For Health, WASH and Environmental Preservation, Food Availability and Nutrition, the UN will support innovative programming, influence national policies and strategies and leverage donor resources to ensure that by 2018, morbidity and mortality in Kenya are substantially reduced, with improved maternal, neonatal and child survival, reduced malnutrition and incidence of communicable and noncommunicable diseases and stabilized population growth, underpinned by a universally accessible, quality and responsive health system. Emphasis will be placed on supporting the country to address its rising burden of Noncommunicable Diseases (NCD) and conditions in line with the Political Declaration of high level meeting of UN General Assembly 2011 and Kenya's own priority. The UN focus will primarily be on mitigating the NCD's key risk factors.

In the area of WASH and Environmental Preservation the UN will foster strategic and multi-sectoral partnerships to support the design of county-based intervention models that ensure community ownership of strategies and promote the use of appropriate technologies for improved access to and utilization of sustainable water and sanitation services, safe hygiene practices and solid and liquid waste management. All interventions will be underpinned by effective and integrated management of water resources (surface and ground) and the introduction of green technologies, such as ECOSAN, to provide affordable sustainable energy and bio-fertilizers at the community level. For Food Availability and Nutrition, the focus will be on promoting strategic and cross cutting partnerships to support county-based interventions that ensure improved nutrition practices and the production and availability of quality food at the household level.

UN agencies will strengthen and expand their joint efforts to promote effective multi-sectoral HIV responses with the aim of ensuring that by 2018, Kenya has reduced the socio-economic impact of HIV and societal vulnerability to HIV by employing a well-coordinated, effective, efficient and adequately resourced multi-sectoral response. Evidence indicates that the achievement of this outcome is among the key conditions for realizing Kenya's MTP2 and Vision 2030 goals. Unlike other infectious diseases, HIV infection is more associated with high levels of stigma, morbidity and mortality, and strikes working-age adults during their most productive years. Through promotion of effective societal responses, the UNDAF will contribute to the reduction of the country's vulnerability to HIV and minimize its economic and social impact.

For Social Protection the UN's support will aim at strengthening Government commitment and leadership, ensuring that by 2016, Kenya's Social Protection policy and strategies ensure Government's effective leadership role, sustainability of achievements, and promotion of innovation and learning; and that the social protection systems are integrated, adequately resourced, well coordinated, effective, efficient and sustainable at national and county levels. Kenya is off track with regard to the achievement of MDG1 (Eradicating Extreme Poverty and Hunger) despite a multiplicity of social protection interventions, which unfortunately remain donor-driven, poorly coordinated and suffer from sustainability issues. Through South-South Cooperation support, the UN will help Government adapt models of effective and sustainable governance and county-driven Social Protection strategies.

Under the Human Capital Strategic Results Area, UNDAF will support the development of effective and efficient county-level social intervention models to inform national policies and strategies. The UN will collaborate with other development partners (donors and BWIs) to ensure that Government has adequate technical and financial capacities to roll out successful intervention models across all 47 counties with the aim of ensuring the delivery of equitably accessible and quality social services to all Kenyans. This will be realized by harnessing agencies' unique technical expertise and adopting joint programming modalities.

The Human Capital work under the UNDAF is aligned with the Social Pillar of Vision 2030.

### **2.3 Strategic Result 3: Inclusive and Sustainable Economic Growth**

*By 2030, Kenya becomes an industrialized middle income country with a modern, equitable, diversified and 24-hour Green Economy in which growth is inclusive and achieves sustainable development, trade is modernized, balanced, competitive and regionally-integrated, and employment matches demand, is stable, SME-driven, decent, accessible (particularly to youth, women and vulnerable groups) and Human Rights compliant.*

Under this Strategic Result Area, the UN and Government have identified three target outcomes for UN support during the UNDAF cycle: Improving the Business Environment; Strengthening Productive Sectors and Trade; and Promoting Job Creation, Skills Development and Improved Working Conditions.

For Kenya to become a middle-income country by 2030, a productive and business environment that provides equal opportunities for men and women will be pre-requisite to a well-functioning economy that would spur growth and attract domestic and foreign direct investment. However, according to the 2013 World Bank Ease of Doing Business Report, Kenya is not performing well in this regard. This UNDAF seeks to influence and support business-related policies to ensure that by 2015, Kenya has a production and business environment that is reformed and designed to effectively nurture local capacities, attract internal and external investments and promote equity, ownership, innovation and entrepreneurship for people-oriented benefits.

With respect to Productive Sectors and Trade, it is expected that joint upstream support from key UN agencies will ensure that by 2018, Kenya's productive and services sectors and their value chains will be in transition towards a participatory, environment friendly, diversified, technologically innovative, green economy that is export oriented and competitive in national, regional and global markets. This result will be achieved, principally, through knowledge, technology and skills transfers, including South-South Cooperation.

To help promote Job Creation, Skills Development and Improved Working Conditions the UN will use evidence-based advocacy and targeted support to policy implementation to ensure that by 2018, the formal and informal sectors, in both urban and rural economies, create employment that is safe, healthy, secure, productive and gainful and that is equitably accessible, particularly for women, youth and vulnerable groups; and the labour force has adequate skills to match market demand. Achieving the result is crucial, not only for reducing unemployment among women and young people, but also for transforming women and youth into key actors in achieving national development goals.

**Strategic Result 3—Inclusive & sustainable economic growth:** By 2030 Kenya is an industrialized middle income country with a modern, inclusive, diversified and 24-hour economy; growth is inclusive and achieves sustainable development; trade is modernized, balanced, competitive and regionally integrated and employment matches the demand, is stable, private sector and SME-driven, decent, equitably accessible particularly to youth, women & vulnerable groups and human rights compliant

**Outcome 3.1—Productive & business environment:** By 2015 Kenya's productive & business environment are reformed to effectively nurture local capacities, attract internal and external investments and promote ownership, innovation and entrepreneurship

**Outcome 3.2—Productive sectors and trade:** By 2018 productive sectors (agriculture, manufacturing, extractive industry) trade and their value chains are private sector and SME-driven, sustainable, diversified, technologically innovative, commercially oriented and competitive on national regional and global markets

All three Inclusive and Sustainable Economic Growth outcomes are designed to contribute to supporting the institutionalization of public-private partnership dialogue and the creation of an environment conducive to SME-driven private sector development and private sector engagement in initiatives focusing on youth and women's employment. Particular focus will be on "green" business and extractive industries, the modernization of agricultural productivity through irrigation and the application of technological advances, climate change adaptation and mitigation frameworks, development of tools to operationalize payments for ecosystem services (PES), especially at the county level, access to global climate finance facilities such as the Adaptation Fund, and promoting energy efficiency and sustainable energy technologies.

The UN will focus on integrated programming, which includes natural resource management, resilience building, inclusive growth and sustainable human development, and food security. Interventions will emphasize institutional and technical capacity for high-level evidence-based policy analysis, advocacy and programming to support national and county development, mainstreaming of environmental and natural resource management, and planning and budgeting. Finally, the UN will continue to advocate for collection of timely and gender-disaggregated data and information for informed policy formulation and performance monitoring.

The Inclusive and Sustainable Economic Growth efforts, under the UNDAF, are aligned with the Economic Pillar of Vision 2030.

## **2.4 Strategic Result 4: Environmental Sustainability, Land Management and Human Security**

*By 2030, Kenya is prosperous, underpinned by efficient management of natural resources and equitable access to development assets, including land and other renewable resources, and achievement and sustainability of national cohesion and resilience that guarantees long-term peace and prosperity.*

Issues of Environmental Sustainability, Land Management and Human Security constitute major development challenges for Kenya. Currently, much of the work being done in these areas is uncoordinated, unsynchronized and consequently ineffective in addressing human security and resilience building needs. Government and the UN have identified two target outcomes under this Strategic Result, namely: Policy and Legal Framework Development; and Peace, Community Security and Resilience. These outcomes have been formulated in consideration of the UN's strong programmatic focus on environmental sustainability, human security and resilience. UN agencies, funds and programmes have considerable cumulative experience in policy and regulatory framework development, institutional support and capacity building. The UN believes that, while progress in this Result Area depends on the enabling conditions effected by other UNDAF results areas, the realization of further progress, including environmental sustainability, improved land management and human security, will accelerate Kenya's transformation and contribute to the achievement of advances in areas of good governance, human capital development and sustainable economic growth.

Working with public and private institutions at national and county levels, the UN will provide evidence-based support to the policy dialogue process in view of ensuring that by 2016, Kenya has robust policies and legal frameworks linking issues of environmental sustainability, climate change and land management to human security and resilience, and supportive of an integrated and coordinated response at all levels. Further, building on this enabling environment, UN agencies will jointly support the establishment of effective systems for community security management, for disaster risk management and for resilience building so that by 2018 counties and communities are able to anticipate, prevent and respond effectively to disasters and emergencies.

The two Environmental Sustainability, Land Management and Human Security outcomes are designed to provide technical support to enhance national and county level capacities to assess, monitor, mitigate and communicate risks and coordinate preparedness, response and recovery. This will be supported by advocacy and technical input for the enactment and operationalization of related policies (e.g. The National Peace Policy). In addition, the UN will contribute to promoting resilience-building among vulnerable communities in both rural and urban areas through support for the planning and development of strategies for livelihoods preservation and resource management.

UN agencies will coordinate efforts to strengthen capacities within the land sector for the smooth implementation of land reforms and establishment of effective mechanisms to implement constitutional provisions on land. This will include support to land sector state and non-state actors to improve harmonization and alignment of land management efforts and technical support to national and county authorities responsible for urban and human settlement to improve urban development, planning, management and governance, and ensure the provision of quality social services.

The focus on disaster risk reduction and prevention of conflict reflects their importance in assuring a secure environment for development. In support of the devolution process, the UN will build on international best practices to support the development of county and community-based models of conflict prevention which promote values of gender sensitivity, respect for Human Rights and a culture of peace to inform national resilience-building strategies.

The UNDAF Result Area on Environmental Sustainability, Land Management and Human Security is aligned with the Social and Economic Pillars of Vision 2030.

### 3 Resource Estimates

The UNCT estimates that approximately \$(US) 1.2 billion will be needed over the 2014-2018 four-year period to achieve the 13 UNDAF outcomes. This includes the financial resource allocations that UN agencies will receive and the funds that they expect to mobilize from external sources but excludes emergency funds as well as World Bank and IMF contributions.

<b>Total by Result Area</b>	<b>173.6</b>	<b>334.0</b>	<b>270.3</b>	<b>406.5</b>	<b>247.0</b>	<b>1185.0</b>

Under the DaO One Leader approach the Resident Coordinator and the UN Country Team will be responsible for the oversight of the Results Groups, the Operations Management Team and the Country Communications Group. The National Steering Committee (NSC) will directly oversee the One Budgetary Framework and Programme. The Technical Support Group will play a critical role in ensuring analytical coherence functions on DaO, with the support of the M&E Technical Working Groups (TWG). UNCT will be responsible for the effective functioning of the Result Groups. Regular UNCT meetings will establish an ongoing, high level of information exchange to strengthen inter-agency collaboration and improve coordination of the UN System as a whole.

## 4.1 Programme Management

The UNCT, under the leadership of the UN Resident Coordinator, will be responsible for the implementation of the UNDAF for the 2014-2018 period. Results Groups will be created with responsibility for providing overall programme coordination. The Technical Support Group will have the coherence analytical role for the DaO with the support of the M&E TWG for coordination for implementation. A Head of Agency will chair each Results Group on behalf of the UNCT. The Results Groups will be organized to contribute to the four sets of UNDAF outcomes through coordinated and collaborative planning, implementation, monitoring and evaluation. Each Results Group will create rolling joint workplans to articulate short-term outputs (annual or biannual) that will contribute to the achievement of the UNDAF outcomes, performance benchmarks, division of labour and budgetary requirements using the same results-based management tools and standards. To ensure maximum reduction of transaction costs for all involved partners, the Results Groups' joint workplans will normally be the only work planning instruments, replacing agency-specific plans, except where other arrangements are agreed upon through the UNCT.

## 4.2 Operations Management

The UNCT places a high priority on integrating Programme and Operations in order to ensure that an appropriate and efficient operational infrastructure exists to implement the UNDAF. Business operations underlie all programming efforts, regardless of the mode of implementation; consolidating operational support to reduce transaction costs and duplication of effort is a priority. The UN already has many common services arrangements both in Nairobi and in its field offices. The Operations Management Team (OMT) will identify and recommend to the UNCT new opportunities for additional common services and activities with potential to lead to greater harmonization of business practices.

The OMT will consist of the Heads of Administrative Operations of UN agencies. OMT is an oversight and coordination body that will rely on individual agencies to implement the agreements reached at OMT planning meetings and endorsed by the UNRC/UNCT. The OMT will prepare a four-year plan to capture the broad priorities for operational synergies within the UN System and to map out the work to be undertaken to achieve these synergies. The Annual Work Plan of the OMT will be the basis for reporting and accountability to the UNRC/UNCT.

# 5 Monitoring and Evaluation

UNDAF 2014-2018 has been designed according to the Results-based Management (RBM) approach. Capacity in application of RBM principles will be continuously reinforced throughout the UNDAF period, within the UN and among partners (including both national and county level Governments) to strengthen planning, monitoring and evaluation for results and evidence generation.

Risk management will be addressed at both the UN and agency levels through established procedures and guidelines for the Harmonized Approach to Cash Transfer (HACT) System and other best practices. A macro assessment of Kenya's public financial management system and joint micro assessments of implementing partners will be conducted to inform financial disbursement decisions.

In line with the focus of the UNDAF on joint outputs, progress on delivery will be tracked through indicators for each of the joint outputs as set out in the annexed Results Matrix. These indicators have been designed and agreed by the individual UN entities contributing to the respective joint outputs. The UN entities convening on each outcome will be responsible for coordinating participating agencies to track and report progress towards the indicators' target values.

Progress reviews will be conducted annually; these will be co-chaired by the UN Resident Coordinator's Office and a senior representative of the Government, with the participation of Civil Society and international development partners.

At the Annual Review, the Outcome Groups will present status of progress towards achievement of the joint outputs. Any changes agreed in the annual review process, including those arising from changes in the overall policy environment and emerging opportunities, will be referred to the Programme Management Team for action. Any such changes will be reflected in the M&E matrix and joint workplan for the following year.

Indicators at the outcome level are aligned, as far as possible, with those of MTP2, particularly in relation to the MDGs. In addition, many of the results indicators are based on those used in MTP2 for coherence and ease of tracking progress. Thus, national monitoring processes and systems will be used to the extent possible. However, as required, the UN will extend support to Government and other partners to strengthen collection, analysis and the use of data. The indicators for the outcomes will also be evaluated during annual progress reviews or whenever new data become available from relevant sources.

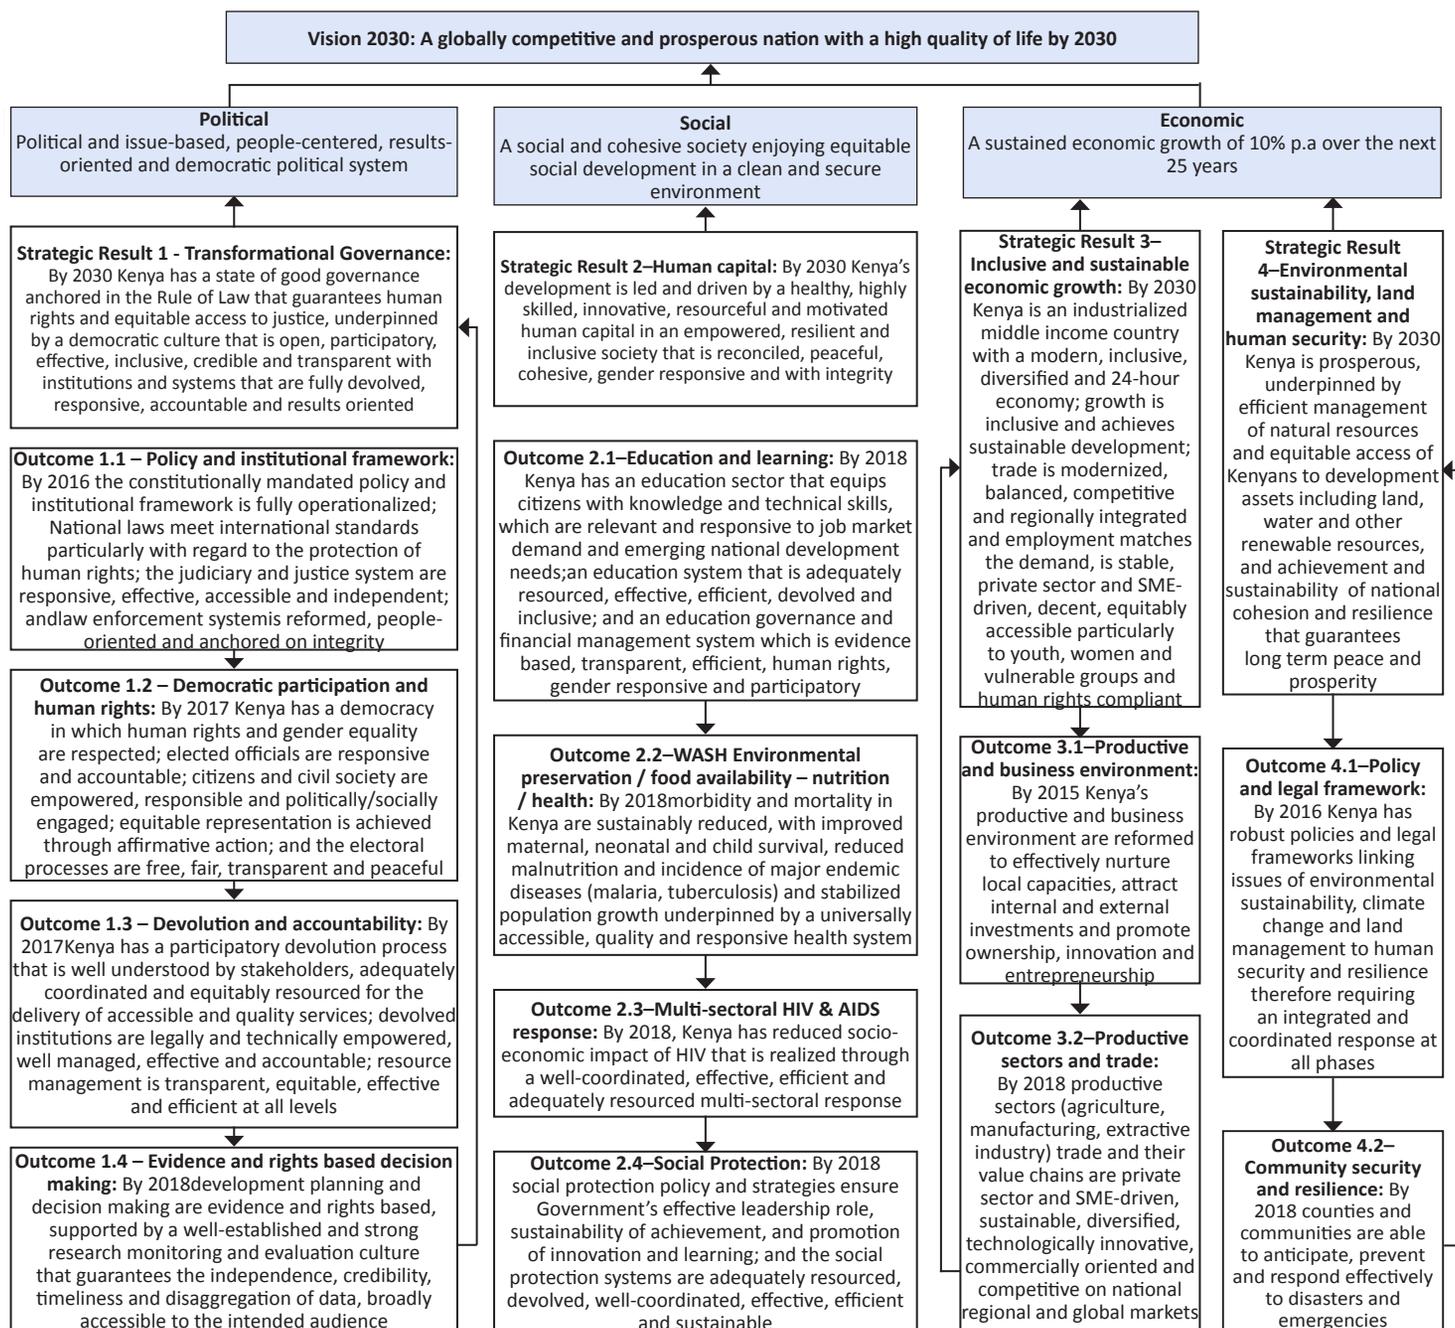

Cognizant of the 2008 UN Development Group (UNDG) directive and in light of the strong focus on gender equality in the UNDAF, the UNCT will implement the 'Accounting for Gender Equality' Scorecard. It intends to provide an assessment of what the UN, as a whole, contributes to gender mainstreaming and, consequently, to the promotion of gender equality. The UNCT Performance Indicators on Human Rights, and Gender Equality and the Empowerment of Women will establish an accountability framework to assess the effectiveness of the UNCT's strategy in support of Human Rights and gender equality and women's empowerment.

Monitoring and Evaluation activities will be participatory and aligned to the M&E framework for MTP2. Joint surveys, research, studies and reviews will be supported to enhance evidence generation and report on what works, as well as what does not.

The M&E Team will assist the UN Country Team to plan and carry out the M&E activities, together with the UNDAF Result Groups (each chaired by a UN Head of Agency) with the overall responsibility for achieving UNDAF outcomes. Key M&E activities include the Annual Reviews and the UNDAF Evaluation. If required, the Mid-term Review will provide an opportunity to take stock, identify bottlenecks and adjust the results framework. The final UNDAF Evaluation will lay the foundation for the design of the next UNDAF.

The review and the evaluation processes will be carried out by parties external to the UN and according to the norms and standards of the UN Evaluation Group (UNEG), examining the relevance, effectiveness, efficiency, and sustainability of the UN's joint programming efforts and their contribution to the UNDAF outcomes. The evaluation will be conducted against the backdrop of the principles and commitments of the Paris Declaration on Aid Effectiveness and the Accra Agenda for Action.

## Linkages between Vision 2030's Three Pillars (Political, Social and Economic) and the UNDAF Strategic Results Areas

**Strategic Result 1 - Transformational Governance:** By 2030 Kenya has a state of good governance anchored in the Rule of Law that guarantees human rights and equitable access to justice, underpinned by a democratic culture that is open, participatory, effective, inclusive, credible and transparent with institutions and systems that are fully devolved, responsive, accountable and results oriented

**Strategic Result 2 – Human capital:** By 2030 Kenya's development is led and driven by a healthy, highly skilled, innovative, resourceful and motivated **human capital** in an empowered, resilient and inclusive **society** that is reconciled, peaceful, cohesive, gender responsive and with integrity

**Outcome 2.1 – Education and learning:** By 2018 Kenya has an **education sector** that equips citizens with knowledge and technical skills, which are relevant and responsive to job market demand and emerging national development needs; an **education system** that is adequately resourced, effective, efficient, devolved and inclusive; and an **education governance and financial management system** which is evidence based, transparent, efficient, human rights, gender responsive and participatory

**Output 2.1.1 – Legislative & policy framework:** MOEST has adequate **technical and financial capacity** to develop, review & operationalize inclusive & evidence-based ECDE, basic, post basic & higher education policies & strategies that inculcate relevant skills to respond to the job market demand; nurture constructive values; & promote gender equality & human rights

**Output 2.1.2 – Partnership & accountability:** MoEST and county Governments have adequate **technical capacities** to effectively (a) lead the coordination of partnerships & funding mechanisms through the education sector-wide approach; and (b) ensure transparent, participatory & accountable management of education resources at all levels

**Output 2.1.3 – Access, equity, quality & relevance:** The education system has strengthened **technical & operational capacity** to develop core foundation skills (literacy & numeracy), information & digital competencies & life skills education including comprehensive sexuality & HIV / AIDS education, peace education & other skills development areas necessary for full participation in society

**Outcome 2.2 – WASH Environmental preservation / food availability – nutrition / health:** By 2018 **morbidity and mortality** in Kenya are sustainably reduced, with improved maternal, neonatal and child survival, reduced malnutrition & incidence of major endemic diseases (malaria, tuberculosis) and stabilized population growth underpinned by a universally accessible, quality and responsive **health system**

**Output 2.2.1 – Health systems:** By (2018) MoH, selected counties & their partners have improved capacity, including through south-south cooperation to plan & operationalize models of innovative, effective, efficient, equitably accessible & quality county-level **health systems**

**Output 2.2.2 – WASH-Env preservation/ food availability/nutrition:** MoH, MEW&NR, MOE, pilot counties and partners have adequate technical and financial capacity to design, implement, monitor and evaluate models of (i) community-based safe WASH & Environmental preservation systems; (ii) hygiene sanitation behavior change at household, health facility and school settings; and (iii) county Government-owned and community driven food availability & nutrition interventions; all of the above designed to inform policies, strategies, standard setting and guide county level development planning

**Output 2.2.3 – RMNCAH:** By 2018 MoH & selected county Governments & partners have adequate institutional & technical capacities, including through south-south cooperation & use of emerging technologies & tools to design, implement & evaluate county-based models of innovative, quality, equitable & integrated maternal, new-born, child & adolescent health services (including sexual & reproductive health)

**Output 2.2.4 – Communicable and noncommunicable conditions:** By 2018, MoH, selected county health management teams & their partners have improved leadership and technical capacity to develop & implement strategies to prevent, control, eliminate or eradicate communicable & NCD's focusing on malaria TB, selected neglected tropical diseases, vaccine-preventable diseases, injuries & mental health

**Outcome 2.3 – Multi-sectoral HIV & AIDS response:** By 2018, Kenya has reduced **socio-economic impact** of HIV that is realized through a well-coordinated, effective, efficient and adequately resourced multi-sectoral response

**Output 2.3.1 – Strategic planning & funding:** By 2015 NACC has the required **technical capacity** to develop & implement a human rights & gender focused national AIDS **strategic plan** supported by treasury with increased sustainable domestic **financing framework** & investment case for HIV which uses **innovative financial solutions**. MDA's in key sectors have required **technical & operational capacity** to develop HIV policies & plans

**Output 2.3.2 – Partnership & coordination:** By 2016, NACC has increased institutional capacity to further develop systems to coordinate, monitor & position AIDS response at the political level (parliament & governors), across sectors, with CSO's & development partners at national & county levels

**Output 2.3.3 – Health sector mainstreaming:** By 2018 MoH have the required technical, financial & operational capacity to integrate HIV services in the health sector including; RH,TB, MCH & provide quality MPTCT, ART, VMMC, PITC care and support services leading to a more efficient and effective health sector response

**Output 2.3.4 – Social response:** By 2018 CSO'S, opinion, religious & community leaders & media personnel have improved **capacity** to meaningfully engage in key decision making processes for accountability of the HIV response at national & county levels; parliamentarians have **increased awareness** for enactment of non-discriminatory policies & legislation; judiciary & law enforcement agencies have raised awareness for implementation of these policies & legislations with a focus on most at risk populations & vulnerable groups

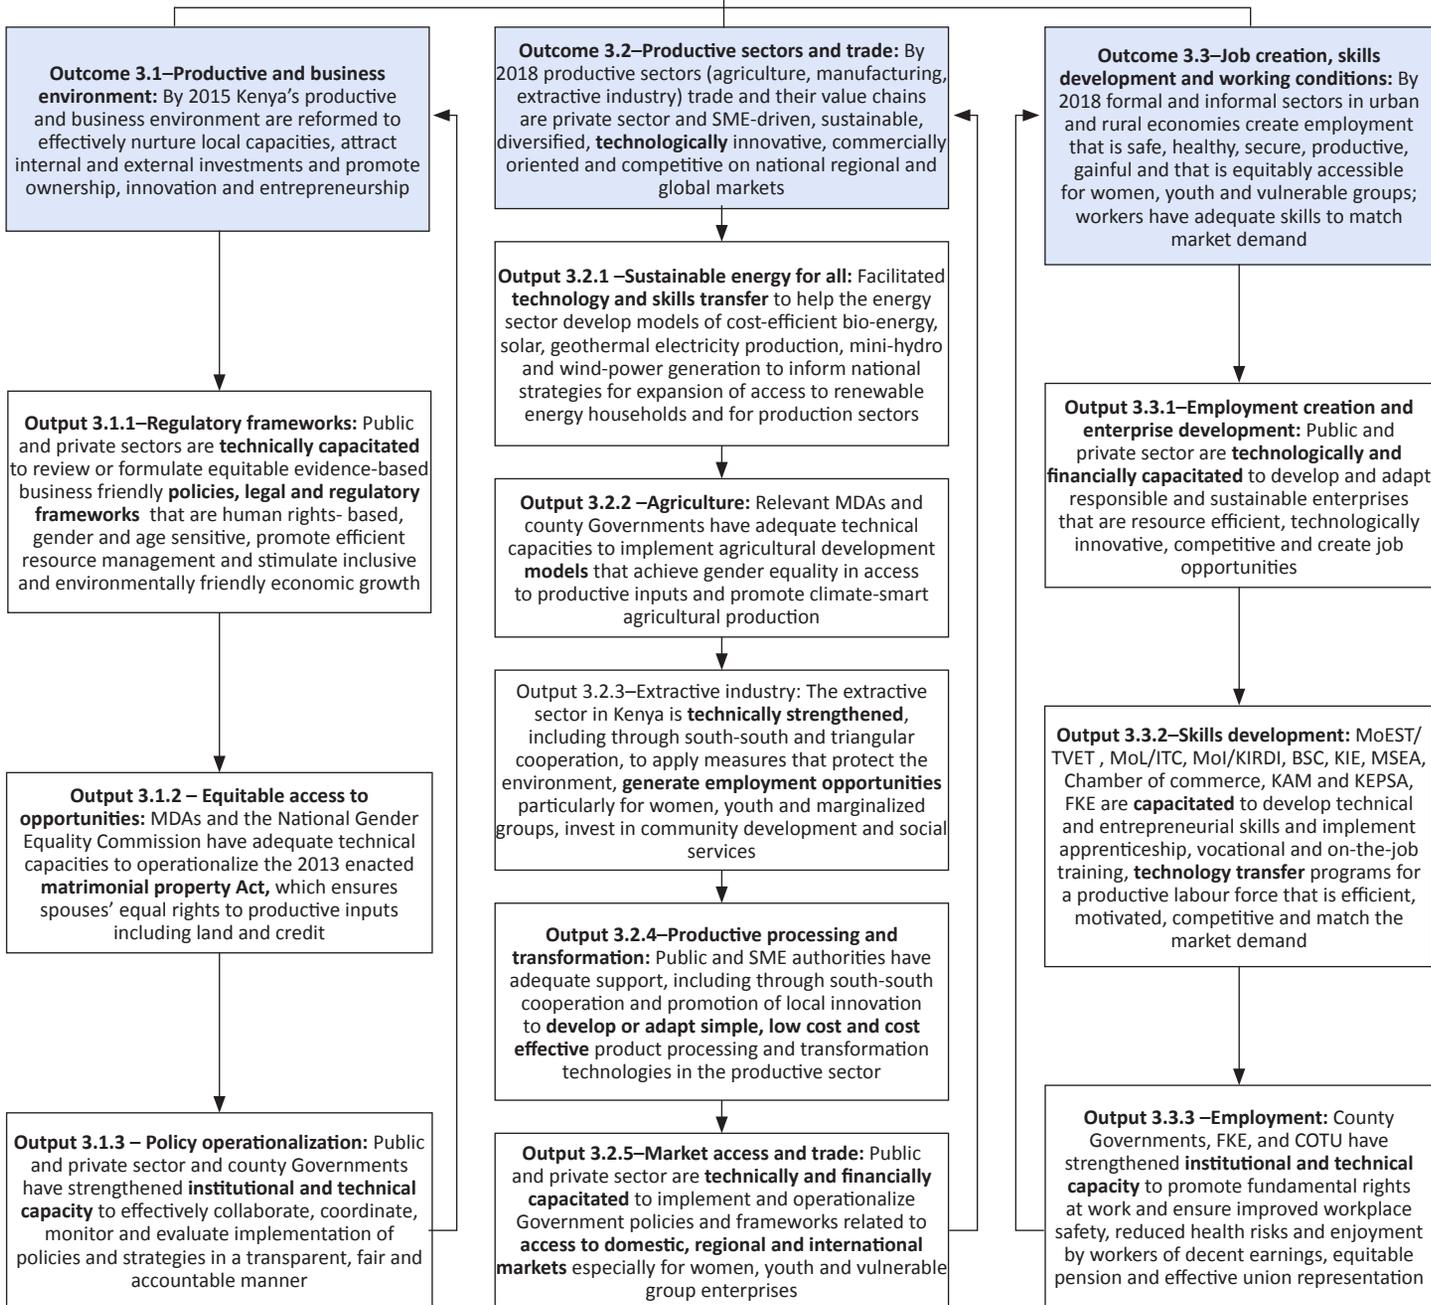

**Outcome 2.4 – Social Protection:** By 2018 **social protection policy and strategies** ensure Government's effective leadership role, sustainability of achievement, and promotion of innovation and learning; and the **social protection systems** are adequately resourced, devolved, well-coordinated, effective, efficient and sustainable

**Output 2.4.1 – National ownership and leadership:** MOLSS, MDP, MoH, county Governments & partners have adequate **technical & financial capacity** to develop a social protection legislative & strategic framework that strengthens Government's leadership, programme integration & coordination; enhances the use of evidence & sets standards, promotes innovation & institutionalization of best practices

**Output 2.4.2 – Coordination:** MOLSS, MDP, MoH, county Governments & partners have adequate **technical & financial capacity** to set up a functional social protection **coordination mechanism** at national & county levels, which are inclusive & ensure harmonization, efficiency, complementarity & synergies of interventions

**Outcome 2.4.3 – Programme implementation:** MOLSS, MDP, MoH, county Governments & partners have adequate **institutional, technical & financial capacity** to plan implement, monitor and evaluate social protection programs to achieve; (a) progressive & sustainable expansion of coverage & adequacy for benefits; & (b) enhanced capacity to respond to shocks

**Strategic Result 3—Inclusive and Sustainable Economic Growth:** By 2030 Kenya is an industrialized middle income country with a modern, inclusive, diversified and 24-hour economy; **growth** is inclusive and achieves sustainable development; **trade** is modernized, balanced, competitive and regionally integrated and **employment** matches the demand, is stable, private sector and SME-driven, decent, equitably accessible particularly to youth, women and vulnerable groups and human rights compliant

**Strategic Result 4—Environmental Sustainability, Land management and Human security:** By 2030 Kenya is prosperous, underpinned by efficient management of natural resources and equitable access of Kenyans to development assets including land, water and other renewable resources, and achievement and sustainability of national cohesion and resilience that guarantees long term peace and prosperity

**Outcome 4.1—Policy and legal framework:** By 2016 Kenya has robust policies and legal frameworks linking issues of environmental sustainability, climate change and land management to human security and resilience therefore requiring an integrated and coordinated response at all phases

**Output 4.1.1 - Policy:** Public and private sector institutions have adequate capacity to develop evidence-based and coherent policy responses to the inter-linked challenges of environmental sustainability, land and natural resource management and human security

**Output 4.1.2 – Land use:** Public institutions dealing with land use management and selected county Governments are **capacitated** to develop & implement equitable county-specific land-use models (approaches) to inform national land reform strategies

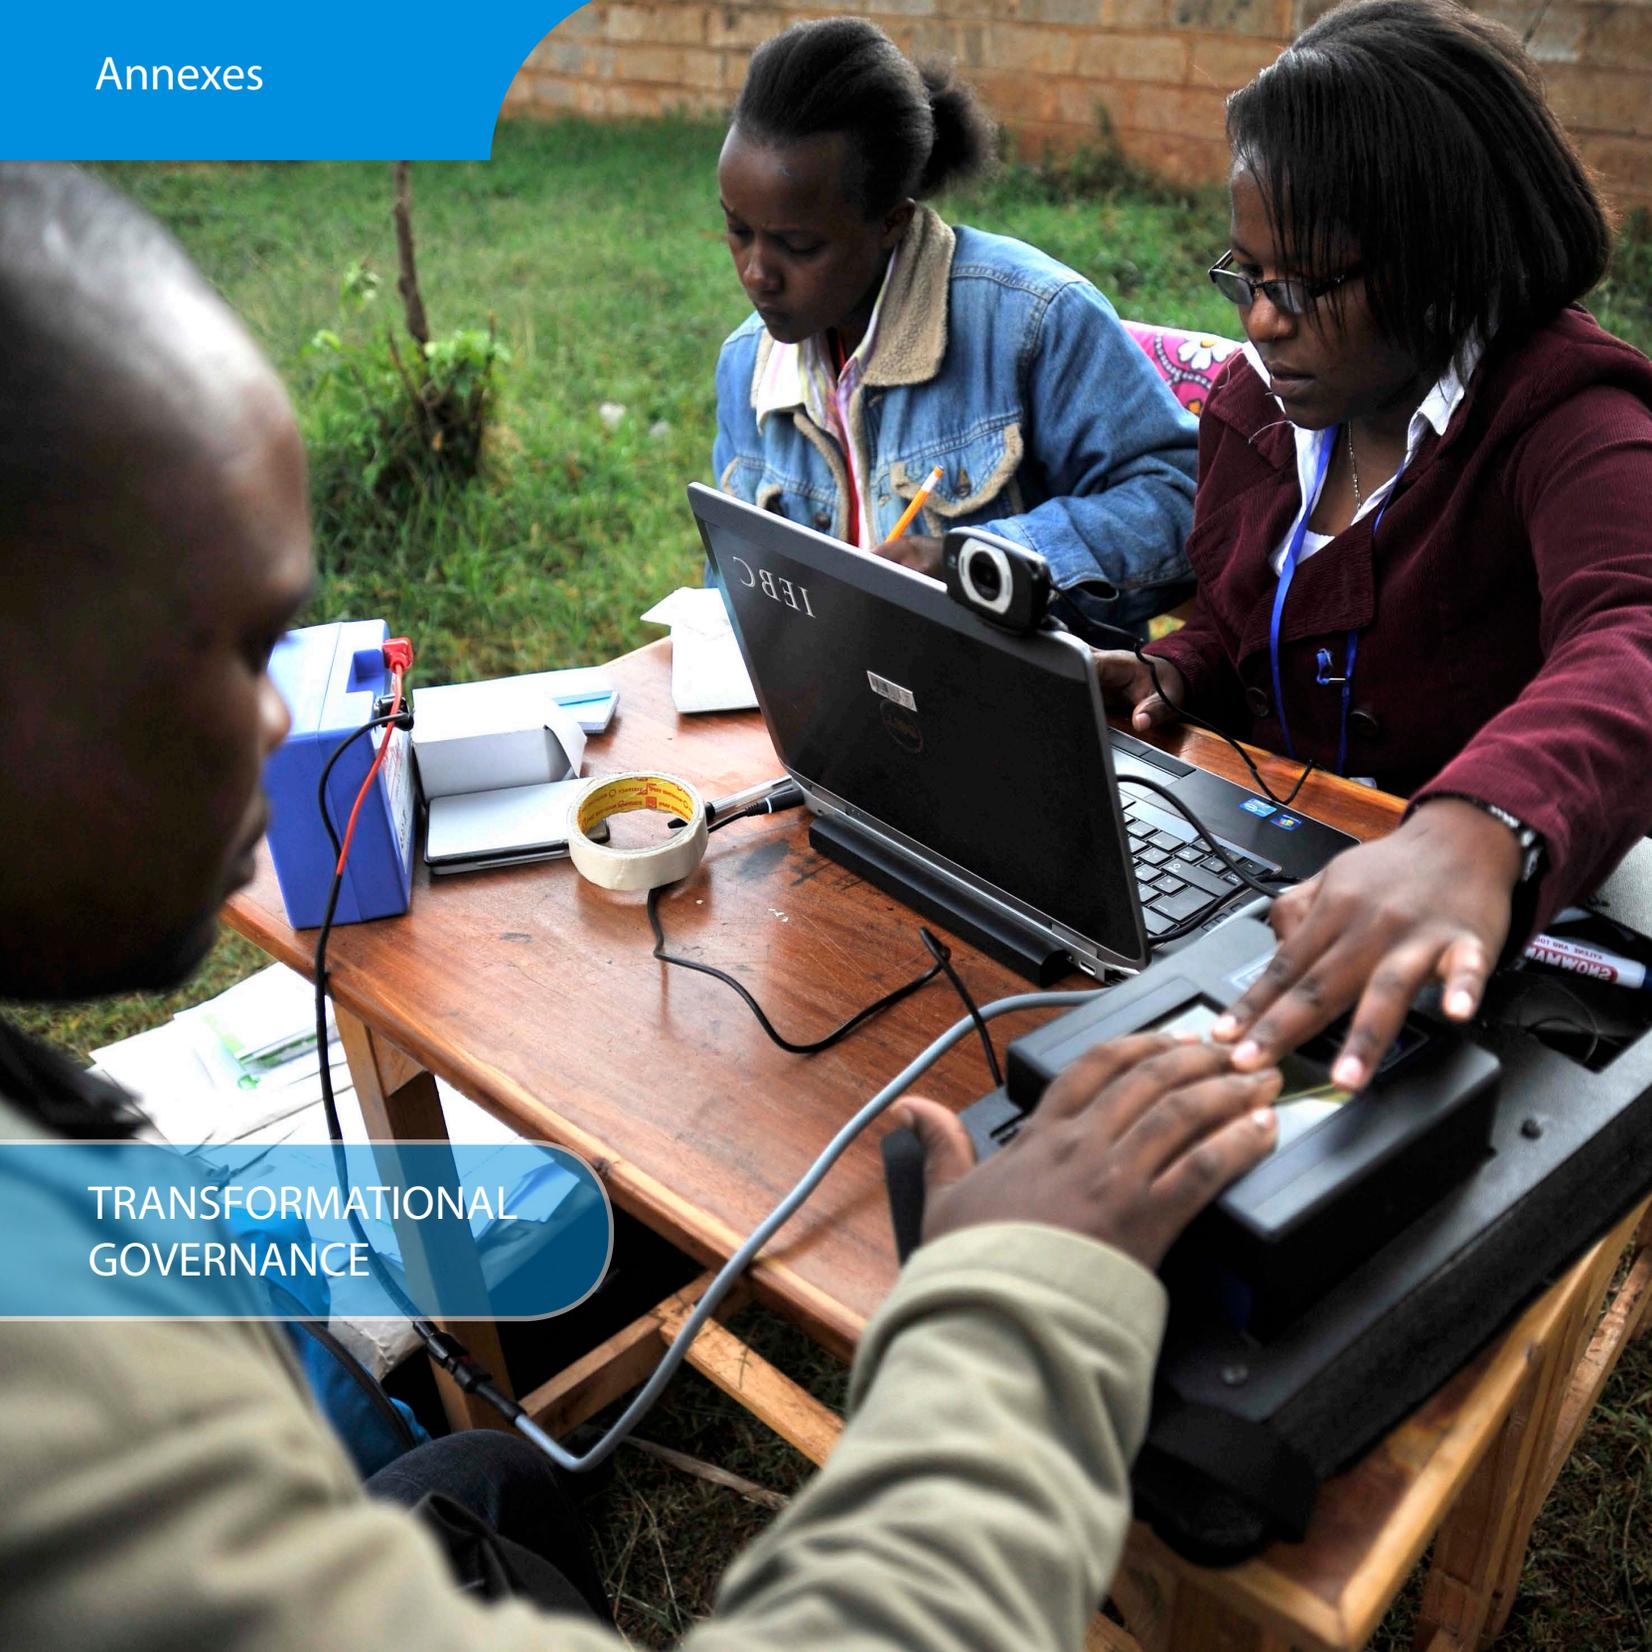

**Output 4.1.3– Policy implementation:** Public and private institutions have adequate **technical and financial capacity** for peacebuilding and for the development and implementation of appropriate and coordinated human rights / gender sensitive responses to environmental challenges, disasters and emergencies

**Outcome 4.2—Community security and resilience:** By 2018 counties and communities are able to anticipate, prevent and respond effectively to disasters and emergencies

**Output 4.2.1—Peacebuilding:** Public institutions, county Governments and key civil society organizations have strengthened **institutional and technical capacity** to effectively formulate, coordinate and guide the implementation of national peace and cohesion strategies

**Output 4.2.2—Disaster Risk Reduction/Management:** National disaster management institutions and counties have integrated, inclusive and responsive **systems, tools and capacities** to effectively formulate, coordinate and implement risk reduction and emergency response and recovery strategies and programs in disaster prone counties

**Output 4.2.3—Border management and community policing:** Law enforcement agencies, border authorities and selected county Governments have adequate **knowledge and skills** to develop and operationalize human rights based and gender sensitive strategies for integrated **border management** and participatory community policing

TRANSFORMATIONAL  
GOVERNANCE

## Strategic Result Area 1: TRANSFORMATIONAL GOVERNANCE

Results and Performance Indicators		Indicative Available Resources: \$173,600,000
1.0	<p><b>Transformational Governance:</b> By 2030 Kenya has a state of good governance anchored in the <b>Rule of Law</b> that guarantees human rights and equitable access to justice, underpinned by a democratic culture that is open, participatory, effective, inclusive, credible and transparent with institutions and systems that are fully devolved, responsive, accountable and results oriented</p> <p>Indicators:</p> <ol style="list-style-type: none"> <li>1. % Of citizens satisfied with access to formal justice services; Baseline: TBD 2014; Target: 65% (2018); MoV: Status of Governance in Kenya, State of the Judiciary and Administration of Justice reports, various national and local level surveys</li> <li>2. <sup>4</sup>This is reported in annual publication of Human Development Report. The data source is UNESCO Institute of Statistics.

2.1

**Outcome 2.1: Education and learning:** By 2018 Kenya has an education sector that equips citizens with knowledge and technical skills, which are relevant and responsive to job market demand and emerging national development needs; an education system that is adequately resourced, effective, efficient, devolved and inclusive; and an education governance and financial management system which is evidence based, transparent, efficient, human rights, gender responsive and participatory

Indicators:

1. % GDP allocation to Education Baseline: 6.4% (2012); Target 8% (2018); MoV: KNBS National Education Accounts
2. No of counties that are effectively<sup>5</sup> implementing County Education Strategic Plans. Baseline: N/A (2013); Target: 47 (2018); MoV: Country Education Strategic Plans monitoring reports
3. No of counties undertaking harmonized learning assessments. Baseline: 0 (2013); Target: 47 (2018); MoV: Country Education Strategic Plans monitoring reports / Country-specific learning assessment reports
4. % Of students in standard 3 having mastered basic learning competencies in literacy and numeracy Baseline: 47.7-literacy; 51.7-numeracy (2010); Target: TBD (2018); MoV: National Assessment System for Monitoring Learner Achievement
5. No of out-of-school children (age 6 to 18) Baseline 1.010m (2013), Target TBD (2018); MoV: NIEMIS / MICS/UIS/ MICS
6. Transition rates from (a) ECDE to primary; (b) primary to secondary/youth polytechnics; and (c) secondary to higher or tertiary education Baseline: (a) ECDE to primary TBD; (b) primary to secondary 76.6% (2012) primary to youth polytechnics TBD; (c) secondary to higher or tertiary education 6.5% (2012); Targets: (a) ECDE to primary 80%; (b) primary to secondary 100%; primary to youth polytechnics TBD (c) secondary to higher or tertiary education 30% (2018); MoV: NIEMIS

### **I-National Parties' Accountability**

Ministry of Education, Science and Technology: Policy formulation, SWAP leadership and implementation, capacity development support to the county Governments, Gender mainstreaming and rights based education.

County Governments, 2) Ministry of Devolution and Planning, 3) Ministry of Health, 4) Ministry of Sports, Culture and Arts, 5) The National Treasury: Partnership in Devolution process (MD&P) ECDE, Life Skills Education (MOH), Resource mobilization (NT), National Values (MSCA) CSOs including ElimuYetu Coalition

Roles: Advocacy on right to education and EFA

### **II-Normative Partners' Accountability**

UNICEF, UNESCO, WFP, ILO, UNDP, (TIVET): technical and financial support in quality, access and child friendly approach (UNICEF); technical and financial support and capacity development in sector planning, quality education, adult and continuing education and tertiary and higher education (UNESCO), technical and financial support for school feeding programme (WFP)

Private Sector, Civil Society Organizations- Education Development Partner Coordination Group (EDPCG): Resource Mobilization; Advocacy

### **III-Main Donors**

World Bank, AfDB, DFID, USAID, JICA, DFTD (CIDA), VVOB, SNV, Aga Khan Foundation, The Global Partnership for Education

BWIs names and roles

Others

<sup>5</sup> 'Effectively' means: implementation undertaken in accordance with the workplan; monitoring and reporting undertaken in accordance with M&E framework, remedial actions taken (if needed).

2.1.1	<p><b>Output 2.1.1: Legislative and policy framework:</b> MOEST has adequate technical and financial capacity to develop, review and operationalize inclusive and evidence-based ECDE, basic, post basic and higher education policies and strategies that inculcate relevant skills to respond to the job market demand; nurture constructive values; and promote gender equality and human rights</p> <p>Indicators:</p> <ol style="list-style-type: none"> <li>1. No of laws, policies and costed strategies (a) designed, adopted and b) implemented to actualize Education Acts<sup>6</sup> and Sessional paper no 14 of 2012 and that meet the human rights based approach (HRBA) criterion<sup>7</sup> Baseline: 2 (2013); Target: TBD (2016); MoV: MoEST official policies and strategies</li> <li>2. Proportion of education expenditure by (a) education levels, (b) recurrent/development, (c) by financing units<sup>8</sup>; Baseline:29.2% 2013;Target TBD (2018), MoV: KNBS National Education Accounts</li> <li>3. N<sup>o</sup> of timely, official education statistics produced annually from the NIEMIS; Baseline: 0 (2014); Target TBD<sup>9</sup> (2018) MoV: NIEMIS and county EMIS reports</li> </ol>	
2.1.2	<p><b>Output 2.1.2: Partnership and accountability:</b> MoEST and county Governments have adequate technical capacities to effectively (a) lead the coordination of partnerships and funding mechanisms through the education sector-wide approach; and (b) ensure transparent, participatory and accountable management of education resources at all levels</p> <p>Indicators:</p> <ol style="list-style-type: none"> <li>1. N<sup>o</sup> of (a) technical and (b) financing partnership agreements<sup>10</sup> developed; Baseline: 0 (2013); Target: 3<sup>11</sup> p.a (2018); MoV: Signed agreement documents</li> <li>2. N<sup>o</sup>of annual Joint Education Sector Review (JRES) led and organized by MoEST with participation of all CGs<sup>12</sup>; Baseline: 0 (2013); Target: 4 (cumulative 2014 – 2018)<sup>13</sup>; MoV: JRES Meeting Reports and Annual Action Plans</li> <li>3. N<sup>o</sup> of county Governments that have developed County Education Sector Support Plans; Baseline: N/A (2013); Target: 47 (2013); MoV: County Education Sector Support Plans and Joint Planning and Review reports</li> <li>4. Proportion of primary and secondary schools with student and parent councils Baseline: P 5% S 70%(2013)Target: P50% S100%(2018); MoV: MoEST official records / Social Intelligence Report</li> </ol>	

<sup>6</sup> There are currently 8 Acts as approved by Parliament, and more is in pipeline

<sup>7</sup> That meet the seven HRBA criterion (equity-focused, rights-based, gender-responsive, evidence-based, competencies-based, labour market-oriented and values-promoting)

<sup>8</sup> The financing units here refer to those who finance education. They are: Government of Kenya, Constituency Development Fund, Local Government (such as LAF, County Governments), External Aid, and NGOs

<sup>9</sup> This is in line with MTP2 Education and Training.

<sup>10</sup> The agreements mean MoU signed between MoEST and Development Partners in order to enable MoEST to implement NESSP with DP support. To be disaggregated by the type of DPs, i.e., donors or UN.

<sup>11</sup> This will be disaggregated by how many by UN agencies, by joint UN as well as by non-UN.

<sup>12</sup> Proportion of recommendations in the annual JRES Aide Memoire that are implemented within a year Baseline (year): Tbd; MoV:JRES Monitoring Reports

<sup>13</sup> To be clarified by MoEST, as to whether they plan to organize a joint planning meeting and joint review. Depending on this the target for this indicator will change.

2.1.3	<p><b>Output 2.1.3: Access, Equity, Quality and Relevance</b></p> <p>The education system has strengthened technical and operational capacities to develop core foundation skills (literacy and numeracy), information and digital competencies and life skills education including comprehensive sexuality and HIV and AIDS education, peace education, and other skills development areas necessary for full participation in society;</p> <p>Indicators:</p> <ol style="list-style-type: none"> <li>1. <sup>14</sup> The data will be disaggregated by sex, geographical location and wealth quantities with particular emphasis on ASAL and urban poor.

<sup>15</sup> The data will be disaggregated by sex and geographical location with particular emphasis on ASAL and urban poor

<sup>16</sup> Relevant means: equity-focused, rights-based, gender-responsive, evidence-based, competencies-based, labour market-oriented and value-promote

**2.2.1 Output 2.2.1 Health systems:** By 2018 MoH, selected counties and their partners have improved capacity, including through south-south cooperation to plan and operationalize models of innovative, effective, efficient, equitably accessible and quality county-level health systems;  
Indicators:

1. Nº of counties with health service delivery system meeting minimum standards. Baseline TBD (2014); Target TBD (2018); MoV: MoH APR
2. Nº of facilities per 10,000 population; Baseline 1.5 (2013); Target 2.5 (2018); MoV: MoH APR
3. % of time out of stock for Essential Medicines and Medical Supplies (EMMS) – days per month; Baseline 8 (2013); Target 2 (2018); MoV: MoH APR
4. % of population accessing services within 5 km of a health facility; Baseline 80% (2013), Target 90% (2018), MoV: MoH APR
5. Proportion of national and county budget allocated to health; National Baseline: 6.3% (2013); Target:15% (2018); MoV: National Budget report; County Baseline: NA; Target:15%; MoV: County Budget report
6. Nº of Medical health workers per 10,000 population; Baseline: 20% (2013); Target: 45 (2018); MoV: MoH APR;
7. % of health facilities with basic component's to support 24 hour emergency services; Baseline TBD (2014); Target TBD (2018); MoV: TBD
8. % of functional community units ; Baseline 20% (2013); Target 45% (2018); MoV: MoH APR
9. Number of volunteer networks, established to implement community-based health promotion: Baseline: 0 (2013); Target: 4 2017, MoV Volunteerism survey

**2.2.2 Output 2.2.2.WASH-Env preservation/food availability/nutrition:** MoH, MEW&NR, MOE, pilot counties and partners have adequate technical and financial capacity to design, implement, monitor and evaluate models of (i) community-based safe WASH and Environmental preservation systems;(ii) hygiene sanitation behavior change at household, health facility and school settings; and (iii) county Government-owned and community driven food availability and nutrition interventions; all of the above designed to inform policies, strategies, standard setting and guide county level development planning  
Indicators:

1. Proportion of the central Government and (b) county health sector budget allocated to Nutrition and WASH. Baseline: TBD (2014); Target: TBD (2018); MoV: County Government budget estimates
2. Nº of select counties that have sustainable<sup>17</sup> community based water supply and sanitation system; Baseline: TBD (2014); Target: TBD (2016); MoV: KIHBS
3. % of population<sup>18</sup> consuming an adequate diet<sup>19</sup>. Baseline: 54.3% (2008/9); Target: 80% (2017/8); MoV: KDHS
4. % of households with improved (not shared) toilet/latrine facilities; Baseline: 24.3% (2008); Target: TBD (2018); MoV: KDHS,
5. % of health facilities with regular water and electricity; Baseline TBD (2014); Target TBD (2018); MoV: TBD

<sup>17</sup> Sustainable means community ownership, operational and maintenance arrangements in place including water safety

<sup>18</sup> Young children (6-23 months), school going children and adults

<sup>19</sup> Adequate diet means receiving 2-3 food groups per day

2.2.3	<p><b>Output 2.2.3 RMNCAH:</b> By 2018 MoH and selected county Governments and partners have adequate institutional and technical capacities, including through south-south cooperation and use of emerging technologies and tools to design, implement and evaluate county-based models of innovative, quality, equitable and integrated maternal, new-born, child and adolescent health services (including sexual and reproductive health)</p> <p>Indicators:</p> <ol style="list-style-type: none"> <li>1. % of births attended by skilled attendant; Baseline: 43% (2008/9) Target: 60% (2018) MoV: KDHS</li> <li>2. % of facilities providing basic emergency obstetric and new-born care; Baseline: 65% (2013); Target: 90% (2018); MoV: MoH APR</li> <li>3. % of children &lt;1 year fully immunized; Baseline: 77% (2008/9) Target: 95% (2018) MoV: KDHS</li> <li>4. Proportion of pregnant women attending ANC receiving PMTCT package; Baseline: 76% (2010) Target: 80% (2016); MoV: Universal Access Report</li> <li>5. % of reproductive age (15-49) receiving family planning; Baseline: 45% (2013); Target: 80% (2018); MoV: MoH APR</li> </ol>	
2.2.4	<p><b>Output 2.2.4. Communicable and noncommunicable conditions:</b> By 2018, MoH, selected county health management teams and their partners have improved leadership and technical capacity to develop and implement strategies to prevent, control, eliminate or eradicate communicable and NCD's focusing on malaria TB, selected neglected tropical diseases, vaccine-preventable diseases, injuries and mental health</p> <p>Indicators:</p> <ol style="list-style-type: none"> <li>1. % of TB patients completing treatment; Baseline: 88% (2013); Target: 90% (2018); MoV: MoH APR</li> <li>2. % of targeted pregnant women provided with LLITN's; Baseline: 30% (2013); Target: 70% (2018); MoV: MoH APR</li> <li>3. % of new outpatient patients with high blood pressure; Baseline: 3% (2013); Target: 1% (2018); MoV: MoH APR</li> <li>4. % of under 5's treated for diarrhoea; Baseline 40% (2013); Target 5% (2018); MoV: MoH APR</li> <li>5. % Women of Reproductive age screened for Cervical cancers; Baseline: 50% (2013); Target: 75% (2018); MoV: MoH APR</li> <li>6. % new outpatient cases attributed to Road traffic Injuries; Baseline: 4% (2013); Target: 2% (2018); MoV: MoH APR</li> </ol>	

<sup>20</sup> Agriculture, Transport, Labour, Defense, and MPD

2.3	<p><b>Outcome 2.3: Multi-sectoral HIV &amp; AIDS response:</b> By 2018, Kenya has reduced socio-economic impact of HIV that is realized through a well-coordinated, effective, efficient and adequately resourced multi-sectoral response</p> <p>Indicators:</p> <ol style="list-style-type: none"> <li>1. % rate of national productivity lost as a result of change in quality of life for HIV + people; Baseline: 4.6% of national productivity reduced as a result of HIV (2006); Target: 3.2% (2018); MoV: Macro Economic impact Assessment</li> <li>2. National budget by source (a) allocated and (b) % disbursed to the total costed NSP IV for HIV; Baseline: TBD (2014); Target: TBD (2018); MoV: NSP</li> <li>3. % of new HIV infections among young women aged 15-24 years; Baseline: 30% (2012); Target: TBD (2018) MoV: Annual HIV estimates report</li> <li>4. MTCT rate: Baseline 15% (2012); Target &lt;5 (2015); MoV: National HIV Estimations</li> <li>5. % prevalence of HIV related stigma and discrimination; Baseline: TBD (2014); Target: TBD (2018) MoV: National Stigma Index Study to be conducted in 2015</li> </ol>	<p><b>II-Normative Parties' Accountability</b></p> <p><b>UNAIDS:</b> Comprehensive HIV services sustainability of the national AIDS response, mainstream HIV and AIDS issues in developing strategies</p> <p><b>UNWOMEN</b> Comprehensive gender responsive HIV services</p> <p><b>UNESCO:</b> Provision of technical and EDUCAIDS</p> <p><b>WFP:</b> Nutritional treatment of malnourished, PLHIVs on ART</p> <p><b>WHO:</b> Revision and update of guidelines and policies</p> <p><b>ILO:</b> Workplace policies</p> <p><b>UNDP:</b> Mainstream HIV and AIDS issues in developing strategies</p> <p><b>IOM:</b> HIV prevention interventions for migrants</p>
2.3.1	<p><b>Output 2.3.1: Strategic planning and funding:</b> By 2015 NACC has the required technical capacity to develop and implement a human rights and gender focused national AIDS strategic plan supported by treasury with increased sustainable domestic financing framework and investment case for HIV which uses innovative financial solutions. MDA's in key sectors have required technical and operational capacity to develop HIV policies and plans;</p> <p>Indicators:</p> <ol style="list-style-type: none"> <li>1. An effective Kenya National AIDS Strategic Plan IV for 2014-2018 developed and operationalized; Baseline: No (2013); Target: Yes (2014); MoV: National AIDS strategic Plan,</li> <li>2. Policy on AIDS Control Units revised and adopted by Cabinet; Baseline: Policy obsolete (2012); Target: Revised and adopted by Cabinet (2015); MoV: Policy document</li> <li>3. Key ministries<sup>20</sup> developed HIV policies and mainstreamed based on KNASP IV. Baseline: TBD (2013); Target: TBD(2015);MoV: Ministerial AIDS Policies</li> <li>4. HIV Financing Strategy including the Investment Case developed and approved by National Treasury; Baseline: Nil (2013); Target:Yes (2015); MoV: HIV financing Strategy</li> </ol>	
2.3.2	<p><b>Output 2.3.2: Partnership and coordination:</b> By 2016, NACC has increased institutional capacity to further develop systems to coordinate, monitor and position AIDS response at the political level (parliament and governors), across sectors, with CSO's and development partners at national and county levels;</p> <p>Indicators:</p> <ol style="list-style-type: none"> <li>1. National AIDS Control Council have costed operational plan to coordinate and monitor the KNASP IV implementation; Baseline: No (2013); Target: Yes (2015); MoV: National Plan of Operations.</li> <li>2. No of counties that have integrated and financed HIV in the development plans and budgets and effectively report to national Government; Baseline: TBD (2014);Target: TBD (2016); MoV: National AIDS Update</li> <li>3. KEWOPA strategic plan of dedicated HIV outcomes; Baseline: No (2013); Target: Yes (2015) MoV: KEWOPA Strategic Plan</li> <li>4. Parliamentary Working Group on HIV established and operational in national assembly; Baseline No (2013); Target Yes (2016); MoV Parliamentary working group reports</li> </ol>	

**2.3.3 Output 2.3.3 Health sector mainstreaming:** By 2018 MoH have the required technical, financial and operational capacity to integrate HIV services in the health sector including; RH, TB, MCH and provide quality MPTCT, ART, VMMC, PITC care and support services leading to a more efficient and effective health sector response

Indicators:

1. % Of total domestic health expenditure that is spent on HIV; Baseline: 49%; (2013) Target: 70% (2018) MoV: National Health Accounts report
2. Number of sites where HIV services are fully integrated into MNCH and TB services; Baseline: 8 (2013); Target: TBD (2018); MoV: MOH annual report
3. Nº of HIV-positive patients screened for TB in HIV care or treatment settings; Baseline: TBD (2012); Target: TBD (2018); MoV: NASCOP Annual report
4. % coverage of antiretroviral treatment (ART) and retention among eligible children and adults; Baseline: 43% children (sex disagg) and 81% adults (sex disagg) (2013); Target: 100% (2018); MoV: NASCOP Annual Report
5. % Coverage of triple drug regimens for all pregnant women living with HIV; Baseline: 74% (2013); Target: 100% (2018); MoV: NASCOP Annual report
6. % Of ART clients reached with nutrition supplements; Baseline: 25% (2013); Target: 80% (2018); MoV: Annual HIV estimates commodity report

**2.3.4 Output 2.3.4: Social response:** By 2018 CSO'S, opinion, religious and community leaders and media personnel have improved capacity to meaningfully engage in key decision making processes for accountability of the HIV response at national and county levels; parliamentarians have increased awareness for enactment of non-discriminatory policies and legislation; judiciary and law enforcement agencies have raised awareness for implementation of these policies and legislations with a focus on most at risk populations and vulnerable groups;

Indicators:

1. Nº of key national and county AIDS strategic decision-making forums that have representations from non-state actors; Baseline: TBD (2014); Target: TBD(2015); MoV: ICC, NOC and county planning committee minutes
2. Proportion of HIV related cases with judgements that promote and protect Human Rights in the context of HIV; Baseline: almost nil (2013); Target: 80% (2018) MoV: KELIN annual reports
3. Nº of national legal frameworks reviewed and disseminated to safeguard HIV related Human Rights; Baseline: 0 (2013); Target: 5 (2018); MoV: NACC annual report
4. Nº of people accessing legal services through the HIV Equity Tribunal; Baseline: 15 (2013); Target: 200 (2018); MoV: KELIN annual report
5. Number of Target police officers sensitized on rights of most at risk populations; Baseline: 50 (2013); Target: 500 (2018); MoV: NACC annual report
6. Nº of volunteer initiatives to raise awareness of the population about HIV/AIDS and provide peer counselling; Baseline: 47 (2008), Target: 55 (2016) MoV: National Survey on Volunteerism in Kenya, UNV/VSO, 2008: (45% of 106 volunteer involving organizations reported about health related programmes)

2.4	<p><b>Outcome 2.4: Social Protection:</b> By 2018 social protection policy and strategies ensure Government's effective leadership role, sustainability of achievement, and promotion of innovation and learning; and the social protection systems are adequately resourced, devolved, well-coordinated, effective, efficient and sustainable</p> <p>Indicators:</p> <ol style="list-style-type: none"> <li>1. Existence of Social protection legislation and Social Protection Strategy; Baseline: No (2013); Target: Social Protection Act and Social Protection Strategy (2015); MoV: Kenya Gazette; Social Protection Sector Reports</li> <li>2. Proportion of poor households accessing social protection; Baseline: Social transfers 14%; Social health insurance 26%; Social security 12%; (2010); Target: 50% social transfers; 10% social health insurance; 40% social security 40% (2018); MoV: KIHBS; Social Protection Sector</li> <li>3. Nº of individual Government-led social protection programmes; Baseline: 21 separate programmes (2010); Target: &lt;10 separate programmes (2017); MoV: Social Protection Sector Reports</li> <li>4. Response time of social protection interventions during and following emergencies; Baseline: 3 months (2011); Target (year): 1 month (2017); MoV: NDMA Reports</li> <li>5. Nº of children accessing child protection services per year, disaggregated by gender and age. Baseline: 5,000 (2012); Target 50 000 (2018); MoV: Reports from the National Child Protection Database and Department of Children Services Reports</li> </ol>	<p><b>I-National Parties' Accountability</b>  Ministry of Labour, Social Security and Services (MoLSS); co-ordination of social protection; oversight of social security; delivery of social cash transfers  MDP (NDMA drought / disaster management);  MoH (health insurance); NSSF (social security provider); NHIF (social health insurance provider); Retirement Benefits Authority  Employers Organizations  Workers Organisations  Kenya Platform for Social Protection; Help Age</p> <p><b>II-Normative Partners' Accountability</b>  UNICEF, WFP, ILO, UNDP, FAO  IOM: Migrants and trafficked persons  Others' names and roles</p> <p><b>III-Main Donors</b>  DFID  SIDA  World Bank</p>
2.4.1	<p><b>Output 2.4.1: National ownership and leadership:</b> MOLSS, MDP, MoH, county Governments and partners have adequate technical and financial capacity to develop a social protection legislative and strategic framework that strengthens Government's leadership, programme integration and coordination; enhances the use of evidence and sets standards, promotes innovation and institutionalization of best practices</p> <p>Indicators:</p> <ol style="list-style-type: none"> <li>1. National Social Protection Council in place and meeting; Baseline: No National Social Protection Council (2012); Target: National Social Protection Council established and meeting (2016); MoV: Kenya Gazette; NSPC meeting minutes</li> <li>2. Nº of Social Protection Secretariat staff trained on social protection approaches<sup>21</sup> ; Baseline:0 (2013); Target: 10 (2016); MoV Social protection Sector reports</li> <li>3. Nº of social protection evidence reports produced and shared; Baseline: 1 (2012); Target: 5 (2016); MoV: Existence of reports; dissemination reports</li> </ol>	
2.4.2	<p><b>Output 2.4.2:Coordination:</b> MOLSS, MDP, MoH, county Governments and partners have adequate technical and financial capacity to set up a functional social protection coordination mechanism at national and county levels, which are inclusive and ensure harmonization, efficiency, complementarity and synergies of interventions</p> <p>Indicators</p> <ol style="list-style-type: none"> <li>1. Proportion of counties with functioning social protection coordination institutions governed by national standards; Baseline 0 (2014); Target: 5 (2016); MoV: Social Protection Sector Monitoring Reports.</li> <li>2. Single registry in place that forms the basis for all social protection programming; Baseline: 5 individual programme registries (2013); Target: Single registry (2017); MoV: Registry; Social Protection Sector Monitoring Reports</li> <li>3. Nº of counties with functioning case management and referral mechanisms linking social protection and child protection systems; Baseline: 0 (2013); Target: 5 (2017); MoV: Department of Children's Services Reports</li> </ol>	

<sup>21</sup> Includes Social protection Floor, integrated social protection systems.

2.4.3

**Output 2.4.3: Programme implementation:** MOLSS, MDP, MoH, county Governments and partners have adequate institutional, technical and financial capacity to plan implement, monitor and evaluate social protection programs to achieve; (a) progressive and sustainable expansion of coverage and adequacy for benefits; and (b) enhanced capacity to respond to shocks

Indicators:

1. Proportion of select counties that have social protection sector development plans in place and effectively implemented<sup>22</sup>; Baseline: 0 (2013); Target: 5 (2016); MoV: Social Protection Sector reports; County Social Protection reports
2. Proportion of trained county officials who report using skills and knowledge in social protection for emergency response; Baseline: TBD (2014); Target: 75% (2017); MoV: Tracer studies and reports; NDMA Reports.
3. Mechanisms<sup>23</sup> for monitoring and periodic review of benefit levels with clear criteria related to international standards established and applied; Baseline: No standard mechanisms (2013); Target: Existence of mechanism and monitoring (2017); MoV: Social Protection Sector Reports; NSSF; NHIF annual reports
4. No of select counties that have child protection system implementation plans in place and effectively implemented<sup>24</sup>; Baseline: 4 (2013); Target: 10 (2018); MoV: CIDP

---

<sup>22</sup> Proposed criteria of effective implementation: (i) activities are reflected in annual budgets; (ii) activities are reflected in annual workplans; (iii) results are reported in annual progress reports; (iv) coverage of social protection is expanding

<sup>23</sup> This would be likely be a National council level recommendation and would ultimately need to be agreed by Treasury or by the Boards of NHIF and NSSF. To be confirmed before June 2014. The word mechanism should be replaced with the specific mechanism that will be established

<sup>24</sup> Proposed criteria of effective implementation: (i) activities are reflected in annual budgets; (ii) activities are reflected in annual workplans; (iii) results are reported in annual progress reports; (iv) coverage of social protection is expanding

INCLUSIVE AND  
SUSTAINABLE  
ECONOMIC GROWTH

### Strategic Result Area 3: INCLUSIVE AND SUSTAINABLE ECONOMIC GROWTH

	Results and Performance Indicators	Indicative Available Resources: \$270,300,000
3.0	<p><b>Inclusive and sustainable economic growth:</b> By 2030 Kenya is an industrialized middle income country with a modern, inclusive, diversified and 24-hour economy; growth is inclusive and achieves sustainable development; trade is modernized, balanced, competitive and regionally integrated and employment matches the demand, is stable, private sector and SME-driven, decent, equitably accessible particularly to youth, women and vulnerable groups and human rights compliant;</p> <p>Indicators</p> <ol style="list-style-type: none"> <li>1. % Annual Growth rate of GDP; Baseline: 4.6 (2012); Target:10.1%(2017); MoV: KNBS, Economic survey reports</li> <li>2. Gini coefficient<sup>25</sup>; Baseline: 42.5 (2008); Target: 40 (2017); MoV: World Bank reports</li> <li>3. Average Number of Jobs created annually; Baseline: 511, 000 (2012); Target: 1M (2017) (at least 30% female and youth) MoV: MoDP, the National Treasury report</li> <li>4. Ratio of formal employment to total employment; Baseline:15% (2013); Target:40% (2017); MoV: MoDP, the National Treasury report</li> <li>5. Global competitiveness index rank; Baseline:96 (2013);Target:50 2017;MoV: World Economic Forum report</li> <li>6. Energy use per\$ GDP; Baseline: 325.05 (2010); Target:315 (2017); MoV: International UN sustainable development Indicators)</li> </ol>	
3.1	<p><b>Outcome 3.1: Productive and business environment:</b> By 2015 Kenya's productive and business environment are reformed to effectively nurture local capacities, attract internal and external investments and promote ownership, innovation and entrepreneurship</p> <ol style="list-style-type: none"> <li>1. Ratio of Investment to GDP. Baseline: 20.5; Target: 32.6; MoV: IMF, Economic Survey</li> <li>2. Foreign direct investment net inflow. Baseline: USD 335,249,880 (2011); Target: TBD (2018) MoV: World Bank Report</li> <li>3. Rank on ease of doing business index. Baseline: 129 (2013); Target: 100(2018); MoV: World Bank Report</li> <li>4. Economic freedom rank. Baseline: 114 (2013); Target: 100 (2018); MoV: World Bank Report</li> <li>5. 3.1.1	<p><b>Output 3.1.1: Regulatory frameworks:</b> Public and private sectors are technically capacitated to review or formulate equitable evidence-based business friendly policies, legal and regulatory frameworks that are human rights- based, gender and age sensitive, promote efficient resource management and stimulate inclusive and environmentally friendly economic growth</p> <p>Indicators</p> <ol style="list-style-type: none"> <li>1. N<sup>o</sup> of business friendly and effective<sup>26</sup> policies and regulatory frameworks (a) reviewed and or formulated and (b) effectively implemented by key sectors<sup>27</sup> . Baseline: Pending legislation framework on youth and gender access to credit and markets<sup>28</sup> (2013); Target: 1 youth and gender friendly legal/policy framework (2015) MoV: Kenya Gazette</li> </ol>	
3.1.2	<p><b>Output 3.1.2: Equitable access to opportunities:</b> MDAs and the National Gender Equality Commission have adequate technical capacities to operationalize the 2013 enacted matrimonial property Act, which ensures spouses' equal rights to productive inputs including land and credit</p>	

<sup>25</sup>Gini index measures the extent to which the distribution of income (or, in some cases, consumption expenditure, food dietary energy consumption) among individuals or households within an economy deviates from a perfectly equal distribution. A Lorenz curve plots the cumulative percentages of total income received against the cumulative number of recipients, starting with the poorest individual or household. The Gini index measures the area between the Lorenz curve and a hypothetical line of absolute equality, expressed as a percentage of the maximum area under the line. Thus a Gini index of 0 represents perfect equality, while an index of 100 implies perfect inequality. Source: WDI 2004

<sup>26</sup>That meet the following criteria: Human Rights-based; gender and age sensitive; promote environmental sustainability and are inclusive

<sup>27</sup>Agriculture, trade, tourism, manufacturing, environment, energy and extraction / mining

<sup>28</sup>UWEZO Fund legal framework is pending; amendment to Kenya's Export Strategy to be gender responsive

3.1.3	<p><b>Output 3.1.3: Policy operationalization:</b> Public and private sector and county Governments have strengthened institutional and technical capacity to effectively collaborate, coordinate, monitor and evaluate implementation of policies and strategies in a transparent, fair and accountable manner</p> <p>Indicators</p> <ol style="list-style-type: none"> <li>1. Nº of counties where Huduma Centres provide all relevant Government services to companies. Baseline: 0 (2013) Target: 47 (2017); MoV: Huduma Centre reports, CIDP</li> </ol>	
3.2	<p><b>Outcome 3.2: Productive sectors and trade:</b> By 2018 productive sectors (agriculture, manufacturing, extractive industry) trade and their value chains are private sector and SME-driven, sustainable, diversified, technologically innovative, commercially oriented and competitive on national regional and global markets</p> <ol style="list-style-type: none"> <li>1. 3.2.1	<p><b>Output 3.2.1: Sustainable energy for all:</b> Facilitated technology and skills transfer to help the energy sector develop models of cost-efficient bio-energy, solar, geothermal electricity production, mini-hydro and wind-power generation to inform national strategies for expansion of access to renewable energy households and for production sectors</p> <p>Indicators</p> <ol style="list-style-type: none"> <li>1. % Access to renewable energy by households in rural areas. Baseline 1.6% (2005); 300,000 rural homes installed with PV systems (2012), 450 eligible 3,000 institutions installed with PV systems (2013), Traditional Biomass contributes 90% of rural household needs (2012), 8,000 biogas digestors (2012); Target: 950 institutions connected with solar energy, additional 100,000 solar home systems installed (2017); 6500 biogas digestors (2019); MoV: (MTPII), GOK reports, ERC reports</li> <li>2. Nº Of cost effective<sup>30</sup> power generation models (a) developed (b) adapted and (c) % adopted. Baseline Zero (no RE hybrid systems), 15.3 MW of small hydro (2013), 5.45 MW wind (2012); Target: 20 wind, solar hybrid generators installed in isolated mini grids (2017), 20 MW of small hydro (2017); MoV: GoK reports</li> <li>3. Share of renewable energy mix sources total energy use. Baseline: 69% including hydro (2011); Target: 80%; MoV: UN sustainable Development indicators</li> <li>4. Nº and amount (KSh) of new innovative financing schemes supporting growth of sustainable energy sector. Baseline: 1 (2013);Target: 5 (2018); MoV: Energy reports, UN Sustainable Energy for All (SE4A) reports</li> <li>5. Measure of energy cost stability. Baseline 35% of electricity from thermal (2012) Target: 70% of electricity from renewables (2017); MoV: GOK reports, Economic Survey</li> </ol>	

<sup>29</sup> Amount of import goods an economy can purchase per unit of export goods

<sup>30</sup> Bio-energy, solar, geothermal electricity production, mini-hydro and wind

**3.2.2 Output 3.2.2 Agriculture:** Relevant MDAs and county Governments have adequate technical capacities to implement agricultural development models that achieve gender equality in access to productive inputs and promote climate-smart agricultural production

Indicators

1. Proportion of Climate Smart agriculture production and processing models (a) developed and (b) implemented. Baseline; TBD Target TBD; MoV TBD
2. Proportion of models adopted disaggregated by model and county; Baseline TBD (2014); Target: TBD (2017); MoV: TBD
3. Area of newly irrigated land and % it represents of total irrigated land. Baseline: 0 (2014); Target: 404,800ha more (2018); MoV Economic Survey
4. Food production Index<sup>31</sup>. Baseline: 126.2 (2013); Target: TBD (2018); MoV: World Bank report
5. % change in Consumer Price Index<sup>32</sup> for food. Baseline: 142.82 (2013); Target: TBD (2017); MoV: KNBS Report on CPI
6. Rate of change in Yields of Major crops and livestock units. Baseline: Maize: 40 million bags, Wheat: 162.7 (000 tonnes), Tea: 369.4 (000 tonnes), Milk: 495 million liters, Cattle and Calves: 2194.2 (000 ) heads, Beef Production 390,000 MTs (2003); Target: Increase by a factor of at least 1.5 (2018); MoV: Economic Survey
7. Post harvest losses for key crops<sup>33</sup>. Baseline 15% (2013); Target: <15% (2017); MoV: National Food Security Reports; KNBS Household Survey

**3.2.3 Output 3.2.3 Extractive industry:** The extractive sector in Kenya is technically strengthened, including through south-south and triangular cooperation, to apply measures that protect the environment, generate employment opportunities particularly for women, youth and marginalized groups, invest in community development and social services

1. N° Of legal, policy and regulatory frameworks in place to ensure transparent, accountable and inclusive revenue management ; Baseline: 0 (2013); Target: 3 (2018). MoV: GOK / UNDP Report on Extractive Industries
2. N° Of effective arbitration mechanisms established to promote dialogue between communities and investors ; Baseline: 0 (2013); Target: 5 (2018). MoV: GOK / UNDP Report on Extractive Industries
3. N° Of jobs created for youth through artisanal mining opportunities; Baseline: 0 (2013); Target: 200 (2018); MoV: GOK / UNDP Report on Extractive Industries
4. N° Of legislation developed/reviewed on extractive industries since the 2010 Constitution; Baseline: 0 (2013); Target: 2 (2018). MoV: GOK / UNDP Report on Extractive Industries
5. N° Of studies measuring the percentage of EI companies' community programs spent on women's and youth projects; Baseline: 0 (2013); Target: 1 (2018). MoV: GoK / UN Women Report on Extractive Industries / KNBS
6. N° Of studies measuring jobs created by the sector (both direct and indirect), disaggregated by sex and age; Baseline: 0 (2013); Target: 1 (2018). MoV: GoK / UN Women Report on Extractive Industries / KNBS N° of conflict risk analyses conducted in relation to the extractives sector. Baseline: 0 (2013); Target: 3 (2018). MoV: Ministry of Interior / GoK / UNDP Report on Extractive Industries

<sup>31</sup> Food production index covers food crops that are considered edible and that contain nutrients. Coffee and tea are excluded because, although edible, they have no nutritive value. (World Bank) It's one of the indices of agricultural production that show the relative level of the aggregate volume of agricultural production for each year in comparison with the base period 2004-2006. They are based on the sum of price-weighted quantities of different agricultural commodities produced after deductions of quantities used as seed and feed weighted in a similar manner. The resulting aggregate represents, therefore, disposable production for any use except as seed and feed (FAO Stat).

<sup>32</sup> Key microeconomic indicator is a measure of weighted aggregate change in retail prices paid by consumers for a given basket of goods and services.

<sup>33</sup> Cereals (Maize, Rice and Sorghum); Grain legumes ( Beans and Cowpea); Root and tuber crops ( Potatoes); Horticulture Crops (Fruits and vegetables)

3.2.4	<p><b>Output 3.2.4: Productive processing and transformation:</b> Public and SME authorities have adequate support, including through south-south cooperation and promotion of local innovation to develop or adapt simple, low cost and cost effective product processing and transformation technologies in the productive sector</p> <p>Indicators</p> <ol style="list-style-type: none"> <li>1. N° Of low cost processing and transformation technologies (a) developed and (b) adopted for key sectors and counties. Baseline: 200 (2013); Target:1,000 (2018); MoV: Economic Survey</li> <li>2. Value and % change in value added by (a) major crops<sup>34</sup> (b) livestock and (c) fisheries. Baseline: 20% (2013); Target:50% (2017); MoV: Economic Survey</li> </ol>	
3.2.5	<p><b>Output 3.2.5: Market access and trade:</b> Public and private sector are technically and financially capacitated to implement and operationalize Government policies and frameworks related to access to domestic, regional and international markets especially for women, youth and vulnerable group enterprises</p> <p>Indicators:</p> <ol style="list-style-type: none"> <li>1. N° of policies and frameworks related to access to domestic, regional and international markets Implemented. Baseline: 5 (2013); Target:30 (2017); MoV: Assessment of the Policies</li> <li>2. N° of private sector actors that sign on to the Women's Empowerment Principles<sup>35</sup> Baseline: 2 (2013);Target: 2 (2018); MoV: UN global compact database</li> <li>3. Proportion of smallholder crop production that is marketed. Baseline: TBD; Target: TBD; MoV: TBD</li> <li>4. Value in agricultural exports and imports for selected commodities. Baseline: TBD (KSH) Target:TBD; MoV: TBD</li> </ol>	
3.3	<p><b>Outcome 3.3: Job creation, skills development and working conditions:</b> By 2018 formal and informal sectors in urban and rural economies create employment that is safe, healthy, secure, productive, gainful and that is equitably accessible for women, youth and vulnerable groups; workers have adequate skills to match market demand</p> <p>Indicators:</p> <ol style="list-style-type: none"> <li>1. N° Of jobs created in the formal and informal sector. Baseline: 999,100 new jobs in 2012; Target: 1,000,000 new jobs per year (2018); MoV: Economic Survey Report, MTP II Monitoring System, Economic Survey Report</li> <li>2. Women's Economic Opportunity Index (EIU) Baseline: 41.32 (2010); Target 60.0 (2017); MoV: Economist Intelligence Unit reports</li> <li>3. Framework for the promotion of green jobs at the national level established. Baseline: 0 National Framework in place(2013); Target: 1 National Framework (2018); MoV: MTP II Monitoring System</li> <li>4. % Of young people engaged in volunteer programmes to gain additional professional experience and skills, disaggregated by gender: Baseline: n/a (2014); Target: 2% (2017)</li> <li>5. Share of women employed in the non-agricultural sector as a percentage of total employment in the non-agricultural sector Baseline: 61% (2006); Target: 70% (2017); MoV: Economic Survey, KNBS, MTP II Monitoring System</li> </ol>	<p><b>I-National Parties' Accountability</b></p> <p>Ministry of Labour, Social Security and Services; Roles: Policy formulation/review on decent employment, wages, workers protection, and occupational safety and health</p> <p>Ministry of Education, Science and Technology: Roles: Policy formulation/review and implementation on Technical and Vocational Education and Training and Entrepreneurial Skills (Specialized Skills)</p> <p>Ministry of Industrialization and Enterprise Development; Roles: Policy formulation on MSE Development; Co-operative Financing Policy (inclusion of Women, Youth and Vulnerable Groups)</p> <p>Ministry of Devolution and Planning; Roles: Policy, programme and strategy formulation and review to be Gender and Youth responsive at the National and County levels</p> <p>National Youth Council; Role: Policy and programme formulation and review on youth skills development/ audit and economic opportunities</p> <p>National Gender and Equality Commission Role: Policy and programme review and formulation on gender responsiveness on economic opportunities</p>
3.3.1	<p><b>Output 3.3.1: Employment creation and enterprise development:</b> Public and private sector are technologically and financially capacitated to develop and adapt responsible and sustainable enterprises that are resource efficient, technologically innovative, competitive and create job opportunities</p> <p>Indicator</p> <ol style="list-style-type: none"> <li>1. N° Of supported and capacitated Public and Private Sector Organizations providing SMEs with enhanced services aimed at increasing SME sustainability. Baseline: TBD (2014)Target: TBD (2018).MoV: UN Agency Program Reports</li> </ol>	

<sup>34</sup> Maize, wheat, teato also include legumes, fruits and vegetables

<sup>35</sup> Women's Empowerment Principles are a set of Principles for business offering guidance on how to empower women in the workplace, marketplace and community. They are the result of collaboration between the United Nations Entity for Gender Equality and the Empowerment of Women (UN Women) and the United Nations Global Compact.

3.3.2	<p><b>Output 3.3.2: Skills development:</b> MoEST/TVET , MoL/ITC, Mol/KIRDI, BSC, KIE, MSEA, Chamber of commerce, KAM and KEPSA, FKE are capacitated to develop technical and entrepreneurial skills and implement apprenticeship, vocational and on-the-job training, technology transfer programs for a productive labour force that is efficient, motivated, competitive and match the market demand</p> <p>Indicators:</p> <ol style="list-style-type: none"> <li>1. A functional<sup>36</sup> National Labour Management Information System and (LMIS) Centers at county levels Baseline: 0 (2014); Target: 1 at National and 1 in each select counties (2017); MoV: LMIS and LMIS County Centers</li> <li>2. N<sup>o</sup> Of counties that have an open learning programme centre in Entrepreneurship Baseline: 1 (NBO) (2014); Target: 20 (2018); MoV: MTP II Monitoring System; Ministry of Industrialization and Enterprise Development Reports</li> <li>3. % Of youth between the ages of 18 and 35 years graduating with TVET institution certificates/ diploma who have gained employment. Baseline: TBD (2014);Target TBD (2018);MoV: NIEMIS, KNBS Economic Survey, Labour Management Information System.</li> </ol>	<p>Youth Enterprise Development Fund and Women Enterprise Fund; Roles: Provide loans, support and facilitate marketing of products and services enterprises access domestic and international markets, provide business development for SMEs, and facilitate employment of women and youth County Governments Roles: Partnership in Devolution process (MD&amp;P) on Skills and Enterprise Development; Resource mobilization</p> <p><b>II-Normative Partners' Accountability</b></p> <p>1) ILO; 2) UNESCO; 3) UNICEF; 4) UNHABITAT; 5) UNWOMEN; 6) FAO; 7) UNIDO; 8) UNEP</p> <p>IOM: Technical support for fair labour practices that prevent labour exploitation and trafficking; livelihood support</p>
3.3.3	<p><b>Output 3.3.3: Employment:</b> County Governments, FKE, and COTU have strengthened institutional and technical capacity to promote fundamental rights at work and ensure improved workplace safety, reduced health risks and enjoyment by workers of decent earnings, equitable pension and effective union representation</p> <p>Indicators</p> <ol style="list-style-type: none"> <li>1. N<sup>o</sup> of sectors captured by minimum wage regulation: Baseline: TBD (2014);Target: TBD (2018); MoV: Sector Wages Orders; Ministry of Labour Gazetted Notices on Wages councils</li> <li>2. Proportion of labour inspectors capacitated and involved in sensitizing, monitoring and enforcing labour laws; Baseline: TBD (2014); Target TBD (2018); MoV: Labour Commissioner Department Records</li> <li>3. % of reported industrial disputes settled. Baseline: 55 (2008) Target: 100% (2018_); MoV: Ministry of labour, industrial disputes register</li> <li>4. Pension replacement rate. Baseline TBD (2014); Target: 100% (2018); MoV: World Bank</li> </ol>	<p>UNDP: Vocational/entrepreneur skills training</p> <p>FAO: Support development of micro and small agro enterprises technical and financial support in quality and access to decent employment, TVET and entrepreneurial skills development, and enterprise development (SMEs; agribusiness/production; ecotourism);</p> <p>UNHCR: Peace building plans among refugees and between refugees and host communities</p> <p>Private Sector (Chamber of Commerce, KAM, and KEPSA), Civil Society (Ashoka; COTU).</p> <p>Roles: Resource Mobilization, Workers' Rights Protection (Unions) and Skills and Enterprise Development Ashoka (CSO); Youth Entrepreneurship Venture Start-up Support and Programming</p> <p><b>III-Main Donors</b></p> <p>Bilateral names and roles</p> <p>BWIs names and roles</p>
