1. By 'Early childhood development programmes' is meant here all organized educational programmes for young children aged 3 to 5 years old (or according to the official age-group in a given country). The data on enrolment should include those in registered pre-schools (or pre-primary schools) and those in other similar organized educational institutions/programmes.

2. Please specify official age-group for early childhood development programmes, if different from 3-5 years old:

Starting age:

Ending age:

Data sources:

Statistical yearbooks published by the Ministry of Science, Technology, Education and Culture and State Statistical Office

1. By 'Early childhood development programmes' is meant here all organized educational programmes for young children aged 3 to 5 years old (or according to the official age-group in a given country). The data on enrolment should include those in registered pre-schools (or pre-primary schools) and those in other similar organized educational institutions/programmes.

2. Please specify official age-group for early childhood development programmes, if different from 3-5 years old:

Starting age:

Ending age:

Data sources:

Statistical yearbooks published by the Ministry of Science, Technology, Education and Culture and State Statistical Office

1. Please specify national standard requirements for primary school teachers in terms of :

(a) Minimum academic qualifications:

Specialized vocational education.

(b) Certification to teach :

2. To the extent possible, the same table may be produced separately for public and private schools.

Data sources :

Statistical yearbooks published by the Ministry of Science, Technology, Education and Culture

TABLE 6 : Indicators 9 and 10 - Percentage of primary school teachers having the required academic qualifications; and
Percentage of primary school teachers who are certified to teach according to national standards ^{1,2}

Country:

MONGOLIA

Year:

1998-1999

1. Data in this table should be derived using the cohort pupil flow model (see note in Annex on cohort analysis and the attached Excel file: TEMPLATE2.XLS).

2. If data in this table cover basic education, please specify below :

Primary education extends from grade to grade

Basic education extends from grade to grade

3. To the extent possible, the same table may be produced separately for public and private schools.

1. Data in this table should be derived using the cohort pupil flow model (see note in Annex on cohort analysis and the attached Excel file: TEMPLATE2.XLS).

2. If data in this table cover basic education, please specify below :

Primary education extends from grade to grade

Basic education extends from grade to grade

3. To the extent possible, the same table may be produced separately for public and private schools.

1. Data in this table should be derived using the cohort pupil flow model (see note in Annex on cohort analysis and the attached Excel file: TEMPLATE2.XLS).

2. If data in this table cover basic education, please specify below :

Primary education extends from grade to grade

Basic education extends from grade to grade

3. To the extent possible, the same table may be produced separately for public and private schools.

1. This data sheet should show the latest results of learning achievement tests. In the absence of such tests, please show the number of pupils passing school examinations by subject in columns 3, 4 and 5 under respectively 'Reading/writing', 'Mathematics' and 'Life skills/others', and the overall number of pupils passing the school examinations, if any, under column 6: 'A.C.S.'

2. Please specify the national norms for :

Reading/Writing:

Mathematics :

Life skills/others:

(Please specify subject if not life skills)

3. A.C.S. refers to 'Any composite score' i.e. pupils achieving an overall passing score for test results in columns 3, 4 and 5.

4. To the extent possible, the same table may be produced separately for public and private schools.
